**The Use and Abuse of EFL Dictionaries** Hilary Nesi, 2000 The book begins with a review of research into dictionary use A number of experimental design problems are discussed in particular the unreliability of questionnaire responses and the need for detailed accounts of individual dictionary consultations whilst sampling in numbers sufficient to represent specified populations The experiments reported in subsequent chapters investigate issues raised in the review The first two studies find that dictionary use during a reading comprehension test affected completion speed but not test scores The apparent failure of dictionary use to improve comprehension is attributed to the test itself the dictionaries and the users choice of look up words The ability of users to interpret dictionary entries is investigated in three further studies which use computers to gather data on large numbers of individual consultations The findings indicate that there is little difference between three major EFL dictionaries in terms of speed of consultation and overall productive success They also indicate that Malaysian ESL subjects who have higher vocabulary scores are slower in their reading and less successful in their interpretation of entries than Portuguese EFL subjects Finally the findings suggest that overall productive success is

unaffected by the presence or absence of examples The experimental findings lead to the conclusion that dictionary consultation is a process in which users match pre existing beliefs about word meaning and behaviour against segments in the dictionary entry Such segments are often selected because they are familiar sounding and conceptually accessible but may contain only incomplete or non essential information Where pre existing beliefs and dictionary information conflict dictionary information is sometimes overridden Thus word knowledge acquired from a single consultation is often insufficient to ensure productive success Although it is probably inevitable that word knowledge will be acquired slowly through multiple encounters modifications to the dictionary entry and the training of users might help to avoid serious misinterpretation of dictionary information Whitaker's Books in Print ,1998

**Monolingual Dictionaries for Foreign Learners of English** Reinhard Heuberger,2000 A constructive evaluation of the state of the art reference works in book form and on CD ROM

**Lexicography** Salonee Priya,2009 Lexicography is a realm of growing academic specialization Dictionaries map meaning onto use We have innumerable dictionaries on different subjects and for different purposes which we keep referring to time and again Despite the frequency with which dictionaries are unquestioningly consulted many have little idea of what actually goes into making them or how meanings are definitively ascertained We have become so accustomed to using dictionaries that we fail to take notice of the effort and time spent in their making Understanding the finer nuances of the art of dictionary making will be of interest to everyone With changing times and the penetration of technology the bulkier forms of dictionaries have given way to softer forms This book updates the reader to the changing notions of the lexicon and dictionary making in the new realm of modern technology and newer electronic tools The book introduces us to lexicography and leads us to dictionaries for general and specific purposes It examines dictionary compilation and research and enables compilers users educators and publishers to look anew at the art of lexicography It duly takes into account the fact that dictionaries are meant to fulfill the needs of specific user groups and reflects the same in the chapters devoted to various professional dictionaries which have recently achieved widespread recognition in the lexicographical literature A good read for students of linguistics teachers and translators apart from general readers interested in knowing the intricate art of making a dictionary
