**Planet Quest** Ken Croswell,1999 Are we alone In 1995 planet hunters discovered the first alien solar system around a star like our own Sun Ken Croswell tells the fascinating story of this discovery and the people who made it then explores the possibility that one day we may have the technology to travel to different solar systems and find life *Memoirs of Frederick A.P. Barnard* John Fulton,1896 *Astronomy*, by W. Kaempffert; introduction by E.E. Barnard Francis Rolt-Wheeler,1909

**Planets & Perception** William Sheehan,1988-11 Do we really know what we see through a telescope How does the ocular system construct planetary images and how does the brain interpret them Drawing on both astronomical and psychological data William Sheehan now offers the first systematic analysis of the perceptual and cognitive factors that go into the initial structuring of a planetary image and its subsequent elaboration Sheehan details the development of lunar and planetary astronomy beginning with Galileo s study of the moon and focuses particularly on the discover of canals on Mars Through each episode he underscores a perceptual or psychological theme such as the importance of differences in vision tachistoscopic perceptual effects the influence of expectation and suggestion on what one sees and the social psychology of scientific discovery *Planets and Perception* is a provocative book that will intrigue anyone who has ever looked through a telescope In addition it offers the psychologically oriented reader a case history in the processes of perception unlike any other in the literature *Nature* Sir Norman Lockyer,1889 *Religions and Extraterrestrial Life* David A.

Weintraub,2014-07-16 In the twenty first century the debate about life on other worlds is quickly changing from the realm of speculation to the domain of hard science Within a few years as a consequence of the rapid discovery by astronomers of planets around other stars astronomers very likely will have discovered clear evidence of life beyond the Earth Such a discovery of extraterrestrial life will change everything Knowing the answer as to whether humanity has company in the universe will trigger one of the greatest intellectual revolutions in history not the least of which will be a challenge for at least some terrestrial religions Which religions will handle the discovery of extraterrestrial life with ease and which will struggle to assimilate this new knowledge about our place in the universe Some religions as currently practiced appear to only be viable on Earth Other religions could be practiced on distant worlds but nevertheless identify both Earth as a place and humankind as a species of singular spiritual religious importance while some religions could be practiced equally well anywhere in the universe by any sentient beings Weintraub guides readers on an invigorating tour of the world s most widely practiced religions It reveals what if anything each religion has to say about the possibility that extraterrestrial life exists and how or if a particular religion would work on other planets in distant parts of the universe *Nature* ,1887 *The Observatory* ,1896 A review of astronomy varies **Stellar Paths** P. Kamp,1981-10-31 This is the latest effort in a sequence of presentations begun in 1949 with a series of lectures on long focus photographic astrometry given by the author as Fulbright professor in Paris at the invitation by the late H Mineur at that time Director of the Institut d Astrophysique These

**Memoirs of Frederick A. P. Barnard, Tenth President of Columbia College in the City of New York** John Fulton, 1896 **Spaceflight**, 1969 **Parallel Lives of Astronomers** William Sheehan, 2024-10-28 Using the Parallel Lives approach adopted by the Greek biographer Plutarch noted historian of astronomy William Sheehan contrasts the lives and research careers of two famous astronomers Percival Lowell and Edward Emerson Barnard Drawing on vast archival materials and hitherto unpublished source materials Sheehan documents in detail the contributions of these two late 19th and early 20th astronomers Living at a time when controversies about Mars peaked when great observatories were being built and when research increasingly turned away from the Solar System toward the stellar and extra galactic universe these observers made spectacular contributions to astronomy Their work still inspires and continues in Perseverance rover s explorations of the surface of Mars carrying forward Lowell s dream of showing that Mars may once have been the abode of life and in Barnard s pioneering wide angle photographs of the Milky Way which first showed the sweep majesty and complexity of the Galaxy The work of decades of research and writing Sheehan has produced what is likely to become the definitive work on these two great astronomers Parallel Lives marks an important contribution to the history of astronomy The book is masterful and inventive William Sheehan could hardly have chosen two more compelling or contrasting personalities to analyze in this fascinating dual biography David Baron author of American Eclipse and The Martians and former Chair in Astrobiology at the Library of Congress Sheehan has united scientific acumen detailed historical research penetrating insight into character and narrative virtuosity and adapted it all to an ancient Greek model a remarkable

achievement Michael Armstrong Assoc Prof Emeritus of Classics Hobart and William Smith Colleges Geneva NY William Sheehan s many books include the authoritative biography *The Immortal Fire Within The Life and Work of Edward Emerson Barnard* and with Jim Bell *Discovering Mars A History of Observation and Exploration of the Red Planet* which has been called the gold standard of books on Mars Michio Kaku **Astronomy** Henry Norris Russell,1926 **Journal of the Tennessee Academy of Science** Tennessee Academy of Science,1926 List of members in each volume **Journal** Tennessee Academy of Science,1926 Vanderbilt Alumnus ,1925 **Publications of the Astronomical Society of the Pacific** Astronomical Society of the Pacific,1890 **Light: a series of experiments, by A.M.
