have long been approached much as the elephant in the proverbial story of the blind men practitioners in the fields of mental health drug abuse and alcohol abuse are apt to examine only the symptoms with which they are most familiar and make diagnoses from those As the blind man holding the elephants tail was certain it was a piece of rope the mental health practitioner faced with a MICA client might see only the mental illness and overlook an equally important need to treat the client s alcohol or drug dependence The MICA population continues to grow for several reasons including an increase in the number of homeless people decreased funding for alcohol drug and mental health treatment mental health hospital deinstitutionalization and the rise in crack use MICA or dually diagnosed clients invariably fall through the cracks of the standard treatment options for mental illness alcohol abuse and drug abuse in large part because the systems often are uncoordinated For example since all use of mood altering substances is forbidden to members of Alcoholics Anonymous an alcohol dependent schizophrenic would have to forego needed medication in order to attend AA meetings At the same time a client who is being treated for alcohol dependence might not find the anticipated lessening of depression after abstinence but may nevertheless be denied access to psychiatric assessment and antidepressant medication In another case psychiatric emergency workers might easily fail to identify drug ingestion as the cause for psychotic episodes in a chronic patient It is not always the fault of misdiagnosis however MICA clients often manipulate mental health and alcohol and drug abuse professionals into fulfilling the need of the moment A MICA client might appear one day as an alcohol abuser the next as a drug addict and the third as a mental patient in order to receive food shelter and clothing The Mentally Ill Chemical Abuser is the first book to close the gaps among the three systems and thereby help practitioners understand the complexities that interfere with progressive treatment of the MICA client Cohen and Levy examine assessment issues and treatment planning problems that arise out of inaccurate assessment They also give an integrated view of the client based on their own practical experience and offer solutions to issues associated with the MICA population Any practitioner interested in the correlation between substance abuse and psychopathology will find this book s clear guidelines essential for better serving the mentally ill chemical abusing patient

New Directions for Mental Health Services, Dual Diagnosis of Major Mental Illness and Substance Disorder Kenneth Minkoff, Robert E. Drake, 1991-07-09 In past years significant advances have been made in both the conceptualization and development of innovative program models providing integrated assessment and concomitant treatment for dually disordered patients The purpose of this volume is to provide the reader with information about the most current ideas and clinical interventions available Although many of the models presented here have been successful only in clinical trials and efficacy is not yet confirmed by controlled research the principles used in the development of these models hopefully will have value in assisting clinicians managers and planners who have an immediate need to provide services to this population This is the 50th issue of the quarterly journal *New Directions for Mental Health Services* Families of the Mentally Ill Agnes B. Hatfield, 1987 *Controversial Issues in Mental Health* Stuart A.

Kirk, Susan D. Einbinder, 1994 Highlights the value of controversy by using a debate format to present both sides of numerous controversial issues in mental health Consists of 19 debates written especially for this volume by experts in the field The topics were selected to cover a wide range of professional interests in the field of mental health and are grouped into five sections identifying mental disorders understanding mental disorders treating mental disorders interprofessional issues and policy issues Designed as a supplementary text for graduate and undergraduate courses in mental health or for social work practicum seminars Families and Mental Health Treatment American Psychiatric Association, Lisa B. Dixon, 1998 The book is a compendium of articles from Psychiatric Services and Hospital and Community Psychiatry on family and mental health treatment *The Chronic Mental Patient* John A. Talbott, 1984 **Journal of Applied Rehabilitation Counseling**, 2004 Toward a national plan for the chronically mentally ill United States. Dept. of Health and Human Services. Steering Committee on the Chronically Mentally Ill, 1980 *Survival Strategies for Public Psychiatry* C. Christian Beels, Leona L. Bachrach, 1989 Clinical Case Management Maxine Harris, Leona L. Bachrach, 1988 Presents models and techniques for enhancing clinical case management services and provides practical advice on a range of issues including financing services treatment planning and involving the patient's family in treatment Offers insight into how case management can help reduce the number of repeat hospitalizations and explores the clinical implications of housing scarcities Improving Mental Health Services David Mechanic, 1987 Differing Approaches to Partial Hospitalization Kenneth Goldberg, 1988 Provides theoretical models and practical techniques to demonstrate the effectiveness of partial hospitalization programs in meeting the needs of a variety of patients Describes three successful programs and the process by which patients progress through treatment **Managed Behavioral Health Care: Current Realities and Future Potential** David Mechanic, 1998-07-14 Discussions of managed care are dominated by emotion and rhetoric and failure to differentiate among the varying structures approaches and strategies that are called managed care These discussions rarely take account of the complexity of the arena or the failures of mental health systems prior to the introduction of managed care If we are to shape managed care constructively we first need clear understanding of how it is structured how it functions and when it performs well and poorly This should help identify how practices can best be monitored evaluated and if necessary regulated This book will help readers along this path This is the 78th issue of the quarterly journal *New Directions for Mental Health Services* For more information on the series please see the Journals and Periodicals section **Report**, 1993
