## **Coalescent Argumentation:**

Coalescent Argumentation Michael A. Gilbert, 2013-11-05 Coalescent Argumentation is based on the concept that arguments can function from agreement rather than disagreement To prove this idea Gilbert first discusses how several components emotional visceral physical and kisceral intuitive are utilized in an argumentative setting by people everyday These components also characterized as modes are vital to argumentative communication because they affect both the argument and the resulting outcome In addition to the components modes this book also stresses the goals in argumentation as a means for understanding one s own and one s opposer s positions Gilbert argues that by viewing positions as complex human events involving a variety of communicative modes we are better able to find commonalities across positions and therefore move from conflict to resolution By focusing on agreement and shared goals in all modes arguers can coalesce diverse positions and more easily distinguish between minor or unrelated differences and core disagreements This permits much greater latitude for locating shared beliefs values and attitudes that will lead to conflict resolution *Facilitating Software Architecture* Andrew Harmel-Law, 2024-11-08 The software architect role is evolving As systems and their interactions with the teams that build run and evolve them become more complex it s often impossible for those playing the traditional architect roles to be everywhere they need to be There s simply too much architecture to be done and the situation has reached a breaking point There s a better way Author Andrew Harmel Law shows you how architects and development teams can collaborate to create and evolve more efficient architectures for their systems Techniques in this book will help you learn how to create a mindset that allows everyone to practice architecture and build the best systems they ve ever experienced With this book you will Understand the new dynamics that affect modern software delivery Learn a methodology that brings software architecture and development together Nurture the fundamental interplay of decisions advice architecture and feedback from running systems Initiate practices that maximize benefits and mitigate risks Create an approach tuned to architecture everyone s skills and your organization s culture *Arguing with People* Michael Gilbert, 2014-06-02 Arguing with People brings developments from the field of Argumentation Theory to bear on critical thinking in a clear and accessible way This book expands the critical thinking toolkit and shows how those tools can be applied in the hurly burly of everyday arguing Gilbert emphasizes the importance of understanding real arguments understanding just who you are arguing with and knowing how to use that information for successful argumentation Interesting examples and partner exercises are provided to demonstrate tangible ways in which the book s lessons can be applied **Rhetoric and Settler Inertia** Patrick Belanger, 2019-05-23 Rhetoric and Settler Inertia Strategies of Canadian Decolonization explores how communication might accelerate decolonial actions in Canada Tracing a middle path between essential Indigenous focused calls for resurgence and idealistic appeals to settler conscience Patrick Belanger identifies communication forms that can generate settler support for decolonization Accenting the importance of both Indigenous and

settler audiences this book suggests the promise of decolonial rhetoric framed in the language of mutual benefit Speech and Debate as Civic Education J. Michael Hogan, Jessica A. Kurr, Michael J.
