Coalitional Behaviour In Theory And Practice:

Coalitional Behaviour in Theory and Practice Geoffrey Pridham, 2009-12-17 This book first published in 1986 takes a fresh look at coalition theory in the light of the European coalition experience This volume attempts to marry theory and practice by avoiding the pure abstraction of the formal coalition theories on the one hand and the over descriptiveness of some of the empirical work on the other This volume of theoretical or comparative chapters and national case studies presents and applies an inductive model for coalitional behaviour in the form of a multi dimensional framework based on the hypothesis of political parties as the central actors in coalition politics In doing so it aims at encouraging a fresh direction in coalition research by focusing on coalitional behaviour as a continuous and dynamic process rather than one confined to the formation of coalitions as well as by overcoming the isolation of coalition studies

Multiparty Government Michael Laver, Norman Schofield, 2025-12-10 The politics of coalition the very heart of the political process in most European countries can be analyzed either theoretically or empirically Multiparty Government aims to reconcile these approaches by placing the insights of contemporary theory within the real world context of coalition politics Michael Laver and Norman Schofield do this by examining five basic themes the identity and motivation of the actors in the coalition game the eventual membership of the coalitions they form their durability the payoffs that are shared out by coalition members and the impact of constitutional bargaining behavioral and historical constraints on the process of coalition bargaining They illustrate their discussion of theory with a range of detailed case studies Multiparty Government offers an accessible approach that bridges the gap between the European politics and game theory traditions of political science and puts the systematic study of the politics of coalition on the broader political science map Laver and Schofield s book is at the same time accessible pithy down to earth insightful and yes even captivating In its scope and quality it has no rival in the literature of party coalitions all students of political parties or legislative behavior should allow themselves the privilege of being educated and entertained by Laver and Schofield s fine book *American Political Science Review*

Political Parties and Coalitional Behaviour in Italy Geoffrey Pridham, 1988

Coalition Politics and Hindu Nationalism Katharine Adeney, Lawrence Saez, 2007-04-11 This new collection examines the emergence of the Bharatiya Janata Party BJP in India and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government Religious influence in contemporary politics offers a fertile ground for political sociological analysis especially in societies where religion is a very important source of collective identity In South Asian societies religion can and often has provided legitimacy to both governments and those who oppose them This book examines the emergence of the BJP and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government The collected authors take stock of the party s first full term in power presiding over the diverse forces of the governing NDA coalition and the 2004 elections They assess the BJP s performance in relation to its stated goals and more specifically how it has fared in a

range of policy fields centre state relations foreign policy defence policies the second generation of economic reforms initiatives to curb corruption and the fate of minorities Explicitly linking the volume to literature on coalition politics this book will be of great importance to students and researchers in the fields of South Asian studies and politics

Between Left and Right Eric Langenbacher, 2010-11-01 Germany remains a leader in Europe as demonstrated by its influential role in the on going policy challenges in response to the post 2008 financial and economic crises Rarely does the composition of a national government matter as much as Germany's did following the 2009 Bundestag election This volume which brings together established and up and coming academics from both sides of the Atlantic delves into the dynamics and consequences surrounding this fateful election How successful was Chancellor Angela Merkel's leadership of the Grand Coalition and what does her new partnership with the Free Democrats auger In the face economic crisis why did German voters empower a center right market liberal coalition Why did the SPD one of the oldest and most distinguished parties in the world self destruct and what are the chances that it will recover The chapters go beyond the contemporary situation and provide deeper analyses of the long term decline of the catchall parties structural changes in the party system electoral behavior the evolution of perceptions of gender in campaigns and the use of new social media in German politics

Political Parties and Coalitions in European Local Government Colin Mellors, Bert Pijnenburg, 2025-09-12 Political Parties and Coalitions in European Local Government 1989 brings together two separate fields in political science the study of coalitions and the study of local government It brings an array of new insights into the landscapes of national government and party politics at local level and in doing so brings into focus the workings of European government for the English reader

Party Policy and Government Coalitions Ian Budge, M.J. Laver, 2016-07-27 Coalitions are the commonest kind of democratic government occurring frequently in most countries of western Europe It is usually assumed that political parties came together in a government coalition because they agree already or can reach an agreement on the policy it should pursue This book examines this idea using evidence from party election programmes and government programmes It demonstrates that party policies do influence government programmes but not to the extent they would if policy agreement were the sole basis of coalition

Pre-electoral Alliances, Coalition Rejections, and Multiparty Governments Marc Debus, 2007 Governing in coalitions is a central research field in comparative political science This book explores how pre electoral alliances and rejections of potential coalitions influence party competition and coalition politics in Austria Belgium Germany Ireland and the Netherlands The study shows that in contrast to the classical perspective coalition politics is determined not only by ideological diversity but also by institutional and behavioralist factors Beside a descriptive analysis of the policy area specific positions of each party and an evaluation of the determinants of coalition formation the payoff structure in coalition governments is under consideration The analysis reveals that key parties receive a surpassing share of both office and policy payoffs
