Bollettino della Società geografica italiana, 1885 *Bollettino della Società geografica italiana* Società geografica italiana, 1882 *I Saw a City Invincible* Gilbert Michael Joseph, Mark D. Szuchman, 1996 When the Spaniards settled in Latin America they immediately surrounded themselves with cities Equating civilization with urban existence the early conquerors of the New World rapidly established themselves as urban lords Latin American cities then became synonymous with Spanish power and all of its privileged attributes political authority ecclesiastical activity commerce finance and conspicuous consumption This volume represents some of the most enduring reflections on the Latin American city All of the essays were written by public officials journalists and social commentators among others who participated actively in the affairs of the cities they so perceptively describe The collection offers critical analyses spanning hundreds of years beginning with the era of the conquistadores in Tenochtitlan and continuing to the deafening bustle of today's urban crowds in Mexico City Professors Gilbert Joseph and Mark Szuchman offer translations of classic pieces by writers previously little known to Western audiences Cobo Garcia Santos Vilhena and Leite de Barros known to Western audiences Cobo Garcia Santos Vilhena and Leite de Barros known to Western audiences Cobo Garcia Santos Vilhena and Leite de Barros *OAG Business Travel Planner*, 1992 [Her Cup for Sweet Cacao](#) Traci Ardren, 2020-12-08 For the ancient Maya food was both sustenance and a tool for building a complex society This collection the first to focus exclusively on the social uses of food in Classic Maya culture deploys a variety of theoretical approaches to examine the meaning of food beyond diet ritual offerings and restrictions medicinal preparations and the role of nostalgia around food among other topics For instance how did Maya feasts build community while also reinforcing social hierarchy What psychoactive substances were the elite Maya drinking in their caves and why Which dogs were good for eating and which breeds became companions Why did even some non elite Maya enjoy cacao but rarely meat Why was meat more available for urban Maya than for those closer to hunting grounds on the fringes of cities How did the molcajete become a vital tool and symbol in Maya gastronomy These chapters written by some of the leading scholars in the field showcase a variety of approaches and present new evidence from faunal remains hieroglyphic texts chemical analyses and art Thoughtful and revealing [Her Cup for Sweet Cacao](#) unlocks a more comprehensive understanding of how food was instrumental to the development of ancient Maya culture *The American Philatelist*, 1925 *The Arena*, 1906 *Theological Anthropology in the Anthropocene* Jan-Olav Henriksen, 2022-12-14 The Anthropocene presents theology and especially theological

anthropology with unprecedented challenges There are no immediately available resources in the theological tradition that reflect directly on such experiences Accordingly the situation calls for contextually based theological reflection of what it means to be human under such circumstances This book discusses the main elements in theological anthropology in light of the fundamental points a that theological anthropology needs to be articulated with reference to and informed by the concrete historical circumstances in which humanity presently finds itself and b that the notion of the Anthropocene can be used as a heuristic tool to describe important traits and conditions that call for a response by humanity and which entail the need for a renewal of what a Christian self understanding means Jan Olav Henriksen explores what such a response entails from the point of view of contemporary theological anthropology and discusses selected topics that can contribute to a contextually based position *Visionary Imaginations* Minette Riordan,1995 **West's South Eastern Reporter** ,1997

Students and Society in Early Modern Spain Richard L. Kagan,2019-12-01 Originally published in 1974 The close connection between universities and bureaucratic institutions such as church and state was perhaps first noticed by Max Weber Such institutions he observed require a dependable source of cadres to run them Thus the size and composition of university enrollments are often a function of bureaucratic needs Richard Kagan examines the dynamics of this relationship historically by tracing the growth and decline of the university system in Castile the heart of the Spanish monarchy between 1500 and 1809 This period marked the emergence of a strong Habsburg state and a militant Catholic church both of which looked to the universities for educated men Accordingly the universities grew rapidly and by 1600 Castile was perhaps the best educated kingdom in Europe But this did not last Jobs were increasingly filled through nepotism causing students to abandon the universities in search of other careers By 1700 the universities were small backward institutions Kagan begins by examining the nature and position of primary secondary and university institutions in Hapsburg Spain concentrating on the extent and purpose of literacy In Part II Kagan discusses the growth and development of the ruling hierarchies in the bureaucratic world and gives special consideration to the criteria used to recruit officials The author concludes with an assessment of the impact of bureaucratic changes in church and state on the universities of Castile The data he collects on changes in the curriculum the professorate and the social and geographical backgrounds of the students are used to support hypotheses about the spectacular rise and collapse of university education in Spain the process of modernization the development of bureaucracies and the crisis of the Spanish monarchy *Students and Society in Early Modern Spain* demonstrates that institutions of higher learning often collapse when they become over professionalized and fail to respond to changing conditions Thus Kagan provides a study of education and social change of why educational institutions are central to a society in one century but only peripheral to it in the next The author casts new light not only on the short lived educational revolution of the sixteenth century but also on education in other societies both past and present New Critical Spaces in Transitional Justice Arnaud Kurze,Christopher K. Lamont,2019-01-10 Since the 1980s transitional justice

mechanisms have been increasingly applied to account for mass atrocities and grave human rights violations throughout the world Over time post conflict justice practices have expanded across continents and state borders and have fueled the creation of new ideas that go beyond traditional notions of amnesty retribution and reconciliation Gathering work from contributors in international law political science sociology and history New Critical Spaces in Transitional Justice addresses issues of space and time in transitional justice studies It explains new trends in responses to post conflict and post authoritarian nations and offers original empirical research to help define the field for the future
