Durable Inequality Charles Tilly, 1998 **Race, Economics, and the Politics of Educational Change** John M. Amis, Paul M. Wright, 2017-01-10 The 2010 national midterm elections produced Republican majorities in Tennessee for the first time since Reconstruction In the wake of that election leaders of the Shelby County Schools SCS school district began legislative maneuvering to advance a long cherished goal granting their schools special school district status a move that would permanently sever the relationship between the SCS and the other school district in the county Memphis City Schools MCS Leaders of MCS realized this action would deprive it of funding from a significant part of the county's tax base So they made a stunning move of their own they renounced the MCS charter Ironically under Tennessee law this action required SCS to take over the running of Memphis's schools SCS would actually be forced to merge with MCS Thus began the largest school district consolidation in the history of the United States

Race Economics and the Politics of Educational Change progresses through nine chapters that examine the MCS SCS merger from a variety of disciplinary perspectives Historical sociological political legal institutional urban planning media studies and educational analyses of the consolidation render John M Amis and Paul M Wright's volume a valuable tool for researchers students policy makers and educators alike The investigations in this work reveal deeply entrenched inequalities that have thwarted education particularly for poor minority students throughout the region's history This text presents insight into factors that have shaped not just the school system in Shelby County but similar systems across the United States A model for other urban areas that face similar challenges this volume will serve as a significant resource for those seeking to understand the trajectory of large scale educational transformations

Euro-Caribbean Societies in the 21st Century Sébastien Chauvin, Peter Clegg, Bruno Cousin, 2018-05-16 This edited collection examines the realities of the last remnants of the European colonial empires in the Caribbean namely the British Dutch and French overseas territories Although known and perhaps infamous for their role as high end tourist destinations and financial centres these small jurisdictions are complex and multifaceted places While this volume considers their role as financial centres it does so from alternative and original perspectives by examining how the sector shapes the internal dynamics of these Caribbean societies and how it is itself shaped by global trends A range of contributions is included that highlight other key issues Political relations between the territories and their metropolitan centres and with the European Union are the focus of several chapters highlighting the stresses and strains and in many cases the unfulfilled expectations of devolved governance Further chapters describe the economic instability and factors of political conflict faced by some of these societies and the available options to address them Finally several chapters reflect more specifically on the territories internal social and ethnic dynamics and the hierarchies and inequalities that result Bringing together a variety of different disciplinary perspectives from political science

to sociology and from anthropology to geography this book will be of great interest to any academic or student who wishes to see how an often overlooked part of the world is actually a key site of socio economic transformation and a crucial nexus in global affairs

Problems and Achievements of a Contested Concept Linda Vuskane, 2020-01-17 Essay from the year 2011 in the subject Politics General and Theories of International Politics grade 8/7 Liverpool John Moores University course Political Ideology language English abstract This essay presents an analysis of the highly contested concept of equality While it will touch on the issues surrounded basic equalities the main focus will be on

the concept and achievement of political equality and the problems associated with it The essay concludes that perhaps an absolute equality in any terms is impossible Different forms of equality influence each other hence achieving one form of equality may prohibit achieving another Many inequalities still exist today in any democratic country not to mention those inequalities of people living under non democratic regimes However change is happening as shown by the evolution of the concept of equality And although the achievement of political equality in practice is undermined by the socioeconomic inequalities still existing in all societies political equality is nevertheless an important goal which we have to strive for
