## **Dutch Reformed Theology:**

New Dictionary of Theology: Historical and Systematic (Second Edition), 2016-04-21 Since its first publication in 1988 the New Dictionary of Theology has been widely appreciated by students and readers as a trustworthy and informative guide. After almost thirty years however there are many new writers, issues, and themes on the agenda for theology that do not stand still. Hence this completely revised second edition includes over 400 new articles in the full set of over 800. Many of the original articles have been expanded and updated and almost all have additional bibliographical references. Since material on biblical theology is now covered at length in IVP's New Dictionary of Biblical Theology, this volume is therefore more specifically a dictionary of historical and systematic theology. The New Dictionary of Theology: Historical and Systematic has an international team of contributors and many are acknowledged experts in their fields. The Dictionary combines excellence in scholarship with a high standard of clarity and insight into current theological issues yet it avoids being unduly technical. Students, teachers, and ministers as well as scholars and everyone seeking a better understanding of theology will value it as an indispensable reference work. The volume is enhanced by a spacious and clear design, an extensive and easy-to-use cross-reference system, and bibliographies which feature the best and most readily available works in English.

The Battle for the Sabbath in the Dutch Reformation Kyle J. Dieleman, 2019-01-21 Kyle J. Dieleman focuses on the doctrinal and practical importance of Sunday observance in the early modern Reformed communities in the Low Countries. My project investigates the theological import of the Sabbath and its practical applications. The first step is to focus on how Dutch Reformed theologians conceived of the Sabbath. The theology of the Sabbath, I argue, moves over time from an emphasis on spiritual rest to participating in the ministries of the church to a strict rest from all work and recreation. The next step is to explore congregants' actual Sunday practices. By attending to church governance records at the national, regional, and local levels, the importance of proper Sabbath observance quickly becomes clear. The provincial synod records, classes records, and consistory records indicate that church authorities were adamant that church members faithfully attend sermon and catechism services, refrain from sinful practices, and abstain from recreational activities. Equally as telling as the observance demanded of church members is how church authorities responded. The church records portray these authorities as fretting over the disordered and unregulated nature of improper Sabbath observance. Having established the importance of the Sabbath in Dutch Reformed theology and lived piety, I argue the emphasis on Sunday observance is best understood as resulting from two main factors. First, the emphasis on proper Sunday observance is a result of the Reformed church authorities attempting to maintain the pious reputation of the Reformed faith and establish the identity of the Reformed Church amid multiple other confessional identities. Second, proper observance of the Sabbath was important because it ensured order within the church and society more broadly.

**Dutch Reformed Covenant Theology in the 20th Century** Nathan Brummel, 2016-10-31 In the 20th century the Dutch Reformed Churches experienced conflict over the doctrine of the divine covenants. This conflict is

evidence of the importance of covenant theology to the Reformed churches Klaas Schilder reacted to the covenant theology of Abraham Kuyper and Herman Bavinck Herman Hoeksema rejected the formulations of William Heyns and Schilder Differences in covenant theology led to church splits in the GKN in the Netherlands and in the Protestant Reformed Churches in North America The author argues that contemporary conflicts connected to the New Perspective on Paul and Federal Vision help to shed light on weaknesses in the covenant formulations of Herman Hoeksema and Klaas Schilder
