Cones, 2010-10-28

The practical and legal aspects of writing a business plan for a film venture can be daunting to navigate without a firm grasp of know how With this in mind John W Cones s *Business Plans for Filmmakers* arms independent movie makers and students with everything they need to successfully tackle the confusing intersection of law business and art when creating a business plan for a movie This pragmatic volume offers plenty of examples and strategies for success sharing straightforward insight

into some of the toughest challenges independent filmmakers face when encountering these documents. With simple yet thorough detail and clarity, Cones outlines the legal requirements affecting movie proposals, including ways to evaluate the necessity for a business plan or a securities disclosure document, as well as the legal definition of an active investor. Also addressed are the numerous subjects filmmakers and students must consider before a film offering, including the efficacy of a business plan to fund the development, production, and distribution phases of a film, common elements of fraud of which fledgling filmmakers should beware, the intricacies of revenue sharing, and how to render financial projections. Cones also imparts useful distinctions between such industry terms as company financing versus project financing, along with many others. This book also includes in-depth guidance through the murky paths of investor analysis and key strategies to find and attract parties interested in financing film. Drawing upon his many years as a securities and entertainment attorney and his experiences advising independent film producers, Cones offers the tools necessary not only to understand investors' motivations but also to use that knowledge to the filmmaker's advantage. Also provided are perceptive studies of the investment vehicles commonly used in business plans seeking investors, with analysis of each method's pros and cons. Throughout the volume, Cones uses sample plans to offer a real-world grasp of the intricacies of the business. In the business of this art, knowledge is power. **Business Plans for Filmmakers** dispels the myths and misinformation circulating among filmmakers to provide accurate and useful advice. **The Audiovisual Cataloging Current** Sandra K. Roe, 2013-10-18

Examine crucial issues for audiovisual cataloging from a variety of perspectives. This vital book addresses both current and historic issues related to audiovisual materials and cataloging. It covers the current cataloging rules for sound recordings, popular music, and nonmusic recordings, videorecordings, including DVDs, electronic resources, whether accessed locally or remotely, three-dimensional objects, and realia, and kits. Three historical articles chronicle the history of audiovisual cataloging in general, the history of cataloging computer files, and the history of *The Thesaurus for Graphic Materials*. A section on audiovisual materials and subject access issues includes a chapter which proposes form genre terms for moving image materials and a special library's creation and use of a new thesaurus and its availability to assist online catalog users. Finally, four contributions examine audiovisual materials and cataloging from the perspectives of different library types: school, public, academic, and special. **The Audiovisual Cataloging Current** provides case studies that show how the National Library of Medicine produces, collects, and catalogs non-print materials; the differences between the Moving Image Genre Form Guide and Library of Congress Subject Headings with recommendations for improving LCSH as a tool; and an exhaustive list of LCSH terms. How libraries and organized cataloging groups developed the Chapter 9 descriptive cataloging rules in AACR2; how the Westchester Library System created a user-friendly online catalog for audiovisual materials; how the Illinois Fire Service Library improved firefighters' subject access to nonprint fire emergency materials; how the National Library of Medicine promotes audiovisual formats; and much more.
