## **Dynamic Structure Of Reality:**

**Dynamic Structure of Reality** Nelson R. Orringer,2010-10-01 Dynamic Structure of Reality makes available in English some of the most mature thought of the modern Spanish philosopher Xavier Zubiri He first presented this material as a set of 1968 public lectures in Madrid They were collected edited and published in 1989 as Estructura din mica de la realidad In 1962 Zubiri had published Sobre la esencia On essence a work of metaphysics that was praised by critics with one qualification its treatment of reality was too static The 1968 course was devised as a response to those critics Dynamic Structure of Reality retraces the road Hegel traveled concerning the creation of a self and how that self is realized by an interplay between spirit and nature Like his great predecessor Jos Ortega y Gasset and like his great Jewish contemporary Emmanuel Levinas Zubiri takes religion in all seriousness and locates its questions within the questions of modern philosophy In harmony with science he advances a new idea of becoming Reality not being becomes As reality s traits are revealed in different degrees reality resembles God the universal self giver Zubiri systematically touches on many disciplines to show the varieties of self giving throughout the universe of structural dynamism

**Unified Reality Theory** Steven Kaufman,2015-12-04 Unified Reality Theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each other or any other aspect of reality I recommend this book to anyone interested in understanding the nature of reality and their place in it Deepak Chopra Unified Reality Theory describes how all reality evolves from an absolute existence It also demonstrates that this absolute existence must have consciousness as an attribute that s intrinsic to its being Thus Unified Reality Theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness Unified Reality Theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation That is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that s twisted upon itself i e it remains whole while differentiating into other forms Thus Unified Reality Theory demonstrates that reality is a state of existential self relation The idea that the universe consists of existence which has formed relationships with itself isn t new Taoists have understood this idea for at least a couple of thousand years What s new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular Ultimately Unified Reality Theory uses science and logic to make the case that God exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that
