Dune Cut-Out Kirk Silverman,1984-09-03 **Coastal Sand Dunes of Oregon and Washington** William S.. Cooper,1958 *Martian Gullies and their Earth Analogues* S.J. Conway,J.L. Carrivick,P.A. Carling,T. de Haas,T.N. Harrison,2019-01-21 Gullies on Mars resemble terrestrial gullies involved in the transport of abundant material down steep slopes by liquid water However liquid water should not be stable at the Martian surface The articles in this volume present the two main opposing theories for Martian gully formation climate driven melting of surficial water ice deposits and seasonal dry ice sublimation The evidence presented ranges from remote sensing observations to experimental simulations to comparison with Earth analogues The opposing hypotheses imply either that Mars has been unusually wet in the last few million years or that it has remained a cold dry desert both with profound implications for understanding the water budget of Mars and its habitability The debate questions the limits of remote sensing data and how we interpret active processes on extra terrestrial planetary surfaces even beyond those on Mars as summarized by the review paper at the beginning of the book Publishers Weekly ,1984 Investigation on the Red River Made in Connection with the Oklahoma-Texas Boundary Suit Elias Howard Sellards,Benjamin Carroll Tharp,Robert Thomas Hill,1923 **Padre Island National Seashore, Oil and Gas Management Plan** ,2000 **The Publishers Weekly** ,1986 **Sand Dunes of the Northern Hemisphere** Qi Lu,Mahesh K. Gaur,Victor R. Squires,2023-03-10 This book in two volumes and with a foreword by the renowned Professor M A J Williams draws on evidence from coastal and inland regions including desert dunes wind blown dust river and lake sediments glacial moraines plant and animal fossils isotope geochemistry soils and prehistoric archaeology to better understand the genesis and development of dunes systems in selected northern hemisphere sand dunes from Asia Africa and the Middle East regions The collection of research papers and case studies that are presented in this book provide the reader with a wealth of information about the distribution and types of sand dunes and an insight into the complexity of sand dune formation migration and management Research in many countries across the northern hemisphere shows that dunes whether coastal or inland are under pressure around the world Much of the pressure comes from human activities and the anthropogenic disturbance when coupled with global warming and alterations to the amount frequency and temporal distribution of precipitation could lead to more serious management challenges in the future There is much that we still need to find out about the origin genesis and development of sand dunes so that they can be managed better The difficult and complex questions being repeatedly raised can be answered only by interdisciplinary endeavours Geomorphologists geologists palaeontologists climatologists ecologists and others can work together on research projects that better define the origin evolution and development of dunes both inland and along the coasts Many chapters in this book attempt to reconstruct past climatic changes in deserts and their margins at a variety of scales in space and time in the expectation that such information might assist in preparing us for future global warming and drying **Children's Books in Print** ,1987
