Projects as Arenas for Renewal and Learning Processes Rolf A. Lundin, Christophe Midler, 2012-12-06 There is a growing tendency to organize various aspects of business life by projects and to set up temporary organizations in a competition where speed and adaptability becomes a major necessity Organizing by projects is perceived as a good way to ensure action and to stress the importance of getting work done However there is a need to balance the stress on action so that learning capabilities are not only retained but augmented Projects as Arenas for Renewal and Learning Processes provides examples of how different types of projects function from a learning or renewal perspective taken from a wide variety of real life environments in industrial and public organizations This book illustrates the mistaken habit of assuming too much in the project area for example project notions are in fact culture dependent classical market oriented contracting business relations do not fit with the learning dimension of projects and long term learning on core competencies and product development projects need to be connected The book is also intended to represent many of the research frontiers in the project field Enhancing learning capabilities is or should be of a mutual concern to researchers and managers alike

Major Infrastructure Projects Edward Ochieng, Andrew Price, David Moore, 2017-09-16 In this unique and comprehensive textbook the authors examine the challenges faced all around the world with regard to major infrastructure project management and they champion a fresh approach that takes into account the interdependencies between economic social political technological and legislative environments Managing developing and investing in crucial infrastructure is essential to keep up with the challenges of a fast paced and globalised world but affecting and overseeing change requires a deep understanding of complex interlocking systems To this end the book is neatly divided into three key parts project appraisal maximising integrated supply chains and implementing value enhancing practices This is the ideal companion for courses on any aspect of civil engineering and construction project management including modules in infrastructure planning infrastructure management construction management and business management The book will also appeal to practitioners involved in the management of capital and infrastructure projects

Sustainable Career Development in the Turbulent, Boundaryless and Internet Age Shih-Chih Chen, Yongrok Choi, Athapol Ruangkanjanases, Yin Ma, 2024-07-22 With the impact of globalization and intensification of information technology the ideas and practices of enterprise management are also changing rapidly nowadays A practice that was incompletely unheard of yesterday may soon become a

model for everyone to learn from tomorrow The development of information technology has blurred the boundaries between work and non work and employees today have more options to work from home At the same time the family structure has also become more diversified with different types of income structures bringing many possibilities for work and family care models In addition the government s social policies such as school to work transitional regulations and the extended retirement age suggest that people today may face a quite different labor market situation compared to other generations As individuals are facing longer and more complicated working life it is very important to ensure their long term employability by creating a healthy and successful career
