Advanced Signature Indexing For Multimedia And Web Applications:

Advanced Signature Indexing for Multimedia and Web Applications Yannis Manolopoulos,Alexandros Nanopoulos,Eleni Tousidou,2012-09-08 Advanced Signature Indexing for Multimedia and Web Applications presents the latest research developments in signature based indexing and query processing specifically in multimedia and Web domains These domains now demand a different designation of hashing information in bit strings i e signatures and new indexes and query processing methods The book provides solutions to these issues and addresses the resulting requirements which are not adequately handled by existing approaches Examples of these applications include searching for similar images representing multi theme layers in maps recommending products to Web clients and indexing large Web log files Special emphasis is given to structure description implementation techniques and clear evaluation of operations performed from a performance perspective Advanced Signature Indexing for Multimedia and Web Applications is an excellent reference for professionals involved in the development of applications in multimedia databases or the Web and may also serve as a textbook for advanced level courses in database and information retrieval systems **New Advances in Information Systems and Technologies** Álvaro Rocha,Ana Maria Correia,Hojjat Adeli,Luis Paulo Reis,Marcelo Mendonça Teixeira,2016-03-15 This book contains a selection of articles from The 2016 World Conference on Information Systems and Technologies WorldCIST 16 held between the 22nd and 24th of March at Recife Pernambuco Brazil WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and challenges of modern Information Systems and Technologies research together with their technological development and applications The main topics covered are Information and Knowledge Management Organizational Models and Information Systems Software and Systems Modeling Software Systems Architectures Applications and Tools Multimedia Systems and Applications Computer Networks Mobility and Pervasive Systems Intelligent and Decision Support Systems Big Data Analytics and Applications Human Computer Interaction Health Informatics Information Technologies in Education Information Technologies in Radiocommunications **Fuzzy Database Modeling with XML** Zongmin Ma,2006-06-15 Fuzzy Database Modeling with XML aims to provide a single record of current research and practical applications in the fuzzy databases This volume is the outgrowth of research the author has conducted in recent years Fuzzy Database Modeling with XML introduces state of the art information to the database research while at the same time serving the information technology professional faced with a non traditional application that defeats conventional approaches The research on fuzzy conceptual models and fuzzy object oriented databases is receiving increasing attention in addition to fuzzy relational database models With rapid advances in network and internet techniques as well the databases have been applied under the environment of distributed information systems It is essential in this case to integrate multiple fuzzy database systems Since databases are commonly employed to store and manipulate XML data additional requirements are necessary to model fuzzy information with XML

Secondly this book maps fuzzy XML model to the fuzzy databases Very few efforts at investigating these issues have thus far occurred Fuzzy Database Modeling with XML is designed for a professional audience of researchers and practitioners in industry This book is also suitable for graduate level students in computer science   <u>Wireless Information Highways</u> Dimitrios Katsaros,Alexandros Nanopoulos,Yannis Manolopoulos,2005-01-01 The field of wireless networks and mobile computing is an area of very active investigation Though the majority of the research and development focuses on devising efficient communication protocols so as to provide a stable communication channel to allow the information flow freely among the mobile clients Recently the investigation turned its interest also to the problem of providing advanced data management functionalities to the clients In order to support data intensive applications over the wireless medium several techniques have been proposed addressing issues like security quality of service service discovery data dissemination location management location based and transactional applications Although much has been written especially recently in this rapidly growing field no other book treats problems in wireless networks from a computer science perspective although a number of books that follow the engineering approach exist Wireless Information Highways provides and excellent introduction and balanced coverage of the most important topics related to the methodologies developed to support data management in asymmetric communication environments This book is based on a number of self contained chapters and provides an opportunity for practitioners and researchers to explore the connection between various computer science techniques and develop solutions to problems that arise in the rapidly emerging field of wireless networks   **Intelligent and Knowledge-Based Computing for Business and Organizational Advancements** Sasaki, Hideyasu,2012-05-31 As organizations businesses and other institutions work to move forward during a new era of ubiquitous modern technology new computing and technology implementation strategies are necessary to harness the shared knowledge of individuals to advance their organizations as a whole Intelligent and Knowledge Based Computing for Business and Organizational Advancements examines the emerging computing paradigm of Collective Intelligence CI The global contributions contained in this publication will prove to be essential to both researchers and practitioners in the computer and information science communities as these populations move toward a new period of fully technology integrated business   **Wireless Information Highways** Katsaros, Dimitrios,Nanopoulos, Alexandros,Manalopoulos, Yannis,2004-12-31 The field of wireless networks and mobile computing is an area of very active investigation Though the majority of the research and development focuses on devising efficient communication protocols so as to provide a stable communication channel to allow the information flow freely among the mobile clients Recently the investigation turned its interest also to the problem of providing advanced data management functionalities to the clients In order to support data intensive applications over the wireless medium several techniques have been proposed addressing issues like security quality of service service discovery data dissemination location management location based and transactional applications Although much has been written

especially recently in this rapidly growing field no other book treats problems in wireless networks from a computer science perspective although a number of books that follow the engineering approach exist Wireless Information Highways provides and excellent introduction and balanced coverage of the most important topics related to the methodologies developed to support data management in asymmetric communication environments This book is based on a number of self contained chapters and provides an opportunity for practitioners and researchers to explore the connection between various computer science techniques and develop solutions to problems that arise in the rapidly emerging field of wireless networks

Stream Data Management Nauman Chaudhry,Kevin Shaw,2005-04-14 Researchers in data management have recently recognized the importance of a new class of data intensive applications that requires managing data streams i e data composed of continuous real time sequence of items Streaming applications pose new and interesting challenges for data management systems Such application domains require queries to be evaluated continuously as opposed to the one time evaluation of a query for traditional applications Streaming data sets grow continuously and queries must be evaluated on such unbounded data sets These as well as other challenges require a major rethink of almost all aspects of traditional database management systems to support streaming applications Stream Data Management comprises eight invited chapters by researchers active in stream data management The collected chapters provide exposition of algorithms languages as well as systems proposed and implemented for managing streaming data Stream Data Management is designed to appeal to researchers or practitioners already involved in stream data management as well as to those starting out in this area This book is also suitable for graduate students in computer science interested in learning about stream data management
