Advances In Argumentation Theory And Research:

Advances in Argumentation Theory and Research J. Robert Cox, Charles Arthur Willard, 1982 For this volume the editors commissioned the top theorists in argumentation and human communication to submit essays in their areas of specialization. Because there are sixteen essays contributed by twenty one specialists many points of view are represented in this volume all of the essayists however look upon argumentation as a process of human communication not a species of formal logic. These essayists see the function of argument as a method of attaining social knowledge. The editors have assembled this volume to make available the latest advances in argumentation for scholars it serves as a state of the discipline report. The editors have divided the book into four sections: Conceptual Foundations, Reasoning and Reasonableness, Methodological Issues and Uses of Argument. Those contributing under the heading Conceptual Foundations are Daniel J O Keefe, Charles Arthur Willard, Ray D Dearin and Henry W Johnstone Jr. Contributors to the Reasoning and Reasonableness section are Ray E McKerrow, Thomas B Farrell, Barbara J O Keefe, Pamela J Benoit, Malcolm O Sillars and Patricia Ganer. Under Methodological Issues the contributors are Scott Jacobs, Sally Jackson, V William Balthrop and Dale Hamble. Contributors to Uses of Argument are Ch Perelman, E Culpepper, Clark Robert P Newman, Walter R Fisher, Richard A Filloy and Richard D Rieke. Reference list prepared by Glenda Rhodes and Jack Rhodes.

Fundamentals of Argumentation Theory Frans H. van Eemeren, Rob Grootendorst, Ralph H. Johnson, Christian Plantin, Charles A. Willard, 2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry. It draws its data, assumptions and methods from disciplines as disparate as formal logic and discourse analysis, linguistics and forensic science, philosophy and psychology, political science and education, sociology and law and rhetoric and artificial intelligence. This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix. This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation. It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research. Argument has been the subject of systematic inquiry for twenty five hundred years. It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues. But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity. This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject. It is precisely on this account that this volume is offered to all the constituent research communities and their students. Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program. Because the chapters are self contained they can be consulted in the order of a reader's interests or research requirements. But there is value in reading the work in its entirety. Jointly authored.

by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field

Argumentation Theory and the Rhetoric of Assent David Williams, Michael David Hazen, 2006-02-05 The themes of the essays in *Argumentation Theory and the Rhetoric of Assent* all coalesce around the general question When if ever is assent justified The question immediate triggers complex and multifaceted considerations of argument and ultimately power In parsing out the nature of assent the essays take diverse approaches aesthetic and symbolist rationalistic and formalistic field theory various conceptualizations of a public sphere etc Together they offer an insightful exploration of an exciting new terrain argumentation studies

Reflections on Theoretical Issues in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2015-08-08 This volume presents a selection of papers reflecting key theoretical issues in argumentation theory Its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation The section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon In turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes All essays included in this volume point out notable recent developments in the study of argumentation
