Evans,1975-02-20 Crops and world food supply crop evolution and the origins of crop physiology Maize Sugar cane Rice Wheat Soybean Pea Potato Sugar beet Cotton The physiological basis of crop yield **Chemistry and Processing of Sugarbeet and Sugarcane** M.A. Clarke,M.A. Godshall,2013-10-22 The world of sugar production has undergone massive changes in the last decade which have resulted in the emergence of many technological changes as technologists strive to develop more efficient and cheaper processes This is the first book to be published for several years which describes the current state of sugar technology It presents the recent developments in beet and cane sugar manufacturing describes the chemistry of sugar processing and products and considers trends and future possibilities in sugar production systems and products The book comprises two sections beet and cane The overview of the crop and the production systems that begins each section serves as a framework for the papers that follow Several papers i e those on sucrose chemistry are relevant to both sugarcane and sugarbeet The authors of the papers are all invited speakers well known in their respective fields The book should be on the shelf of all sugarcane and sugarbeet factories and refiners around the world as well as those companies who are sugar users or who supply goods and services to the sugar industry It can also be used as a text by universities offering training courses in sugar processing technology **Progress in Plant Breeding—1** G.E. Russell,2013-10-02 Progress in Plant Breeding 1 is a collection of review articles that aim to critically assess progress in different major crops not only in the aspect of variety production but also across all the related disciplines The book covers topics such as dwarfing genes in wheat sugar beet breeding development of grain protein crops and the breeding programs of the International Potato Center Also covered in the book are topics such as the development of bird

resistance of sorghum and maize advances in the breeding of chickpeas and breeding rice for disease resistance The text is recommended for botanists and agriculturists who would like to know more about the advances in plant breeding and how it is improving crops The Sugar Beet Crop D.A. Cooke, J.E. Scott, 2012-12-06 D A Cooke and R K Scott Sugar beet is one of just two crops the other being sugar cane which constitute the only important sources of sucrose a product with sweetening and preserving properties that make it a major component of or additive to a vast range of foods beverages and pharmaceuticals Sugar as sucrose is almost invariably called has been a valued component of the human diet for thousands of years For the great majority of that time the only source of pure sucrose was the sugar cane plant varieties of which are all species or hybrids within the genus *Saccharum* The sugar cane crop was and is restricted to tropical and subtropical regions and until the eighteenth century the sugar produced from it was available in Europe only to the privileged few However the expansion of cane production particularly in the Caribbean area in the late seventeenth and the eighteenth centuries and the new sugar beet crop in Europe in the nineteenth century meant that sugar became available to an increasing proportion of the world's population *New Zealand Journal of Crop and Horticultural Science/Experimental Agriculture* ,1984
