*Federal Plan for Advanced Networking Research and Development*, 2008 **Network Management and Control** I.T. Frisch, S.S. Panwar, 1994-08-31 Three speakers at the Second Workshop on Network Management and Control nostalgically remembered the INTEROP Conference at which SNMP was able to interface even to CD players and toasters We agreed this was indeed a major step forward in standards but wondered if anyone noticed whether the toast was burned let alone would want to eat it The assurance of the correct operation of practical systems under difficult environments emerged as the dominant theme of the workshop with growth interoperability performance and scalability as the primary sub themes Perhaps this thrust is un surprising since about half the 100 or so attendees were from industry with a strong contingency of users Indeed the technical program co chairs Shivendra Panwar of Polytechnic and Walter Johnston of NYNEX took as their assignment the coverage of real problems and opportunities in industry Nevertheless we take it as a real indication of progress in the field that the community is beginning to take for granted the availability of standards and even the ability to detect physical link and network level faults and is now expecting diagnostics at higher levels as well as system wide solutions **Enabling Optical Internet with Advanced Network Technologies** Javier Aracil, Franco Callegati, 2009-06-20 This book provides a broad overview of IP over WDM technologies as seen by a group of experts participating in the e Photon ONeC and BONE Networks of Excellence funded within the VIth and VIIth Research Framework Programmes FP6 and FP7 of the European Union Both Networks of Excellence are aimed at the integration of research

teams active on optical networks at a pan European level with the creation of virtual centers of excellence in optical networks technologies and services The working groups on optical core networks gathered about a 100 researchers from more than 20 universities and research institutions in Europe The multifaceted viewpoints available in this community on the current state and future evolution of large WDM networking infrastructures are reported in this book The book is organized in chapters with chapter editors listed on pp having the responsibility to collect and harmonize contributions by different search groups The whole work was made possible by the coordination efforts of Javier Aracil and Franco Callegati leaders at the time when the book writing was begun of the working groups on optical core networks and on optical burst switching in the Photon ONEC We are thankful to them for their efforts We hope that this manuscript will serve as a valuable reference for students and practitioners in the field of optical networking
