Advances In Program Theory:

Advances in Program Theory Leonard Bickman,1990 A Connotational Theory of Program Structure James S. Royer,1987-08-26 This book presents developments of a language independent theory of program structure The theory features a simple natural notion of control structure which is much broader than in other theories of programming languages such as denotational semantics and program schemes This notion permits treatment of control structures which involve not only the denotation of programs i e their input output behavior but also their structure size run times etc The theory also treats the relation of control structure and complexity properties of programming languages The book focuses on expressive interdependencies of control structures which control structures can be expressed by which others A general method of proving control structures expressively independent is developed The book also considers characterizations of the expressive power of general purpose programming languages in terms of control structures Several new characterizations are presented and two compactness results for such characterizations are shown Evaluation Roots Marvin C. Alkin,2012-04-12 Evaluation Roots A Wider Perspective of Theorists Views and Influences Second Edition provides an updated examination of current evaluation theories and traces their evolution Marvin C Alkin shows how theories build upon theories and how the theories are related to each other The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory In addition to the editor s overview the book contains essays by leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree All royalties from sales of this book are donated to support the AEA Research on Evaluation Student Award Advanced Programming and Design Kevin McCombs,2016-12-15 As students transition to higher levels of robotics the problems they are asked to solve become more difficult This book covers some more advanced tasks such as soldering and welding and using CAD to design the robot Also included are examples of how physics can be used to see if elements of the robot are strong enough to perform a task Assessment 101 in Higher Education Keston H. Fulcher,Megan R. Good,Elizabeth R. H. Sanchez,2024-10-31 Assessment 101 is your all in one guide to conducting and facilitating assessment in specific programs as well as coordinating institution wide assessment processes This book covers all fundamental elements of the assessment cycle Student learning outcomes curriculum mapping instruments data collection results and interpretation and most importantly use of results for improvement Complete with pro tips designed for busy professionals this text offers practical guidance on how the assessment process can be implemented and managed at various altitudes within an institution This foundational timely resource is for anyone involved in student learning outcomes assessment at the program or institutional level Verified Software: Theories, Tools, Experiments Bertrand Meyer,James Woodcock,2008-07-07 A Step Towards Verified Software Worries about the reliability of software are as old as software itself techniques for allaying these worries predate even James King s 1969 thesis on A program verifier What gives the whole

topic a new urgency is the conjunction of three phenomena the blitz like spread of software rich systems to control ever more facets of our world and our lives our growing impatience with deficiencies and the development proceeding more slowly alas than the other two trends of techniques to ensure and verify software quality In 2002 Tony Hoare one of the most distinguished contributors to these advances over the past four decades came to the conclusion that piecemeal efforts are no longer sufficient and proposed a Grand Challenge intended to achieve over 15 years the production of a verifying compiler a tool that while processing programs would also guarantee their adherence to specified properties of correctness robustness safety security and other desirable properties As Hoare sees it this endeavor is not a mere research project as might normally be carried out by one team or a small consortium of teams but a momentous endeavor comparable in its scope to the successful mission to send a man to the moon or to the sequencing of the human genome *Computation Theory and Logic* Egon Börger,1987-07-29 In Memory of Dieter R tting 24 8 1937 4 6 1984 On the Occasion of the 50th Anniversary of His Birth **Computer Programming to Insure Project Accountability in Africa** Abdul Karim Bangura,2001 This is the first book of its kind to offer a series of computer programming models for the practical purpose of insuring project accountability in African countries Despite its practicality the book is also theoretically well grounded By doing so it seeks to extend the epistemological boundaries of both Computer Science and Economics It is therefore useful for students and teachers in those disciplines and for policy makers and practitioners in the field of economic development Proceedings of the ... Annual Session of the Michigan State Grange of Patrons of Husbandry Michigan State Grange,1905 *Evaluation Country Development Policies and Programs* Robert Picciotto,Ray C. Rist,1995-10-02 This issue of New Directions for Evaluation deals with the special evaluation problems of programs in the developing world Over the last two decades the framework of economic and social development policy and practice has been transformed This is due in part to evaluation lessons which have helped to shape the new development priorities toward sustainability participation and insitutional development In turn evaluation must deal with the consequences of a more demanding agenda a more fractured development constituency and a vastly more complex set of analytical questions This publication presents the views of development policy makers practitioners and evaluators on the kinds of adjustments needed in the approaches instruments and processes used by development evaluators The chapters were discussed in draft form at a Conference on Evaluation and Development hosted by the world Bank in Washington D C in December 1994 The resulting collection offers a consistent framework for further debate and proposes new emphases for development evaluation This is the 67th issue in the journal series New Directions for Evaluation For more information on the series please see the Journals and Periodicals page Kyoto University Bulletin Kyōto Daigaku,1999 Programme of the Courses of Instruction Massachusetts Institute of Technology,1905 Graduate Degree Programs Pennsylvania State College.
