but for generations information and opinions about food were found in the food sections of newspapers in communities large and small. Until the early 1970s these sections were housed in the women's pages of newspapers where women could hold an authoritative voice. The food editors, often a mix of trained journalist and home economist, reported on everything from nutrition news to features on the new chef in town. They wrote recipes and solicited ideas from readers. The sections reflected the trends of the time and the cooks of the community. The editors were local celebrities judging cooking contests and getting calls at home about how to prepare a Thanksgiving turkey. They were consumer advocates and reporters for food safety and nutrition. They helped make James Beard and Julia Child household names as the editors wrote about their television appearances and reviewed their cookbooks. These food editors laid the foundation for the food community that Nora Ephron described in her classic 1968 essay *The Food Establishment* and eventually led to the food communities of today. Included in the chapters are profiles of such food editors as Jane Nickerson, Jeanne Voltz, and Ruth Ellen Church, who were unheralded pioneers in the field, as well as Cecily Brownstone, Poppy Cannon, and Clementine Paddleford, who are well known today. An analysis of their work demonstrates changes in the country's culinary history. The book concludes with a look at how the women's pages folded at the same time that home economics saw its field transformed and with thoughts about the foundation that these women laid for the food journalism of today.

Six Women Who Shaped What Americans Eat Michelle Mart, 2025-07-15

Six Women Who Shaped What Americans Eat tells the story of how food choice in modern America has been influenced by culture, industrial abundance, and health narratives. Mart reflects on the careers of six women to illustrate the varied and overlapping influences on food choice. Each of these women had a substantial impact on American cuisine, attitudes toward food, and what people chose to eat. They highlighted the politics of food, the pleasure of food, the connection between food and health, and the environmental harm of poor food choices. Part one of the book discusses the bounties of the modern American food system and covers Hazel Stiebeling, Poppy Cannon, and Julia Child. Stiebeling was a chemist and government nutritionist beginning in the 1930s and shaped dietary guidelines and school lunches that affected generations of Americans. Cannon, a best-selling cookbook author and newspaper columnist, gained fame in the 1950s by preaching the wonders of processed food. Child, another cookbook author and television personality starting in the 1960s, celebrated French cuisine and made it accessible to American cooks and palates. Part two examines the hidden costs of abundance and covers Frances Moore Lapp, Marion Nestle, and Alice Waters. Lapp was an author and activist concerned with the environmental impact of food in the late 20th century and who is credited with bringing vegetarianism into the mainstream. Nestle was an academic nutritionist, government consultant, and author who decried the undue influence of food corporations. Waters, a celebrity chef, restaurateur, and food activist, became a symbol of alternative food movements in the 21st century.

Intoxicating Pleasures Lisa Sheryl Jacobson, 2024

In popular memory, the repeal of US Prohibition in 1933 signaled alcohol's decisive triumph in a decades-long culture war. But

as Lisa Jacobson reveals alcohol's respectability and mass market success were neither sudden nor assured. It took a world war and a battalion of public relations experts and tastemakers to transform wine, beer, and whiskey into emblems of the American good life. Alcohol producers and their allies—a group that included scientists, trade associations, restaurateurs, home economists, cookbook authors, and New Deal planners—powered a publicity machine that linked alcohol to wartime food crusades and new ideas about the place of pleasure in modern American life. In this deeply researched and engagingly written book, Jacobson shows how the yearnings of ordinary consumers and military personnel shaped alcohol's cultural reinvention and put intoxicating pleasures at the center of broader debates about the rights and obligations of citizens.

Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II, but so did the complex economic controls needed to sustain that production. Artillery, tanks, planes, ships, trucks, and weaponry of every kind were constantly demanded by the military and readily supplied by American business. While that relationship was remarkably successful in helping the U.S. win the war, it also raised troubling issues about wartime economies that have never been fully resolved. Paul Koistinen's fourth installment of a monumental five-volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war. Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945, describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services. Koistinen traces the evolution of federal agencies mobilizing for war, including the National Defense Advisory Commission, the Office of Production Management, and the Supply Priorities and Allocation Board, and then focuses on the work of the War Production Board from 1942-1945. As the war progressed, the WPB and related agencies oversaw the military's supply and procurement systems, stabilized the economy, while financing the war, closely monitored labor relations, and controlled the shipping and rationing of fuel and food. In chronicling American mobilization, Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti-New Deal corporate elements battled for control over mobilization itself. As the armed services emerged as the principal customers of a command economy, the military-industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will. The product of exhaustive archival

research Arsenal of World War II shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe
