**Extreme Collecting** Graeme Were,J. C. H. King,2012-03-01 By exploring the processes of collecting which challenge the bounds of normally acceptable practice this book debates the practice of collecting difficult objects from a historical and contemporary perspective and discusses the acquisition of objects related to war and genocide and those purchased from the internet as well as considering human remains mass produced objects and illicitly traded antiquities The aim is to apply a critical approach to the rigidity of museums in maintaining essentially nineteenth century ideas of collecting and to move towards identifying priorities for collection policies in museums which are inclusive of acquiring difficult objects Much of the book engages with the question of the limits to the practice of collecting as a means to think through the implementation of new strategies

**Assembling the Dinosaur** Lukas Rieppel,2019-06-24 A lively account of the dinosaur s role in Gilded Age America examining the connection between business paleontology and museums Although dinosaur fossils were first found in England a series of dramatic discoveries during the late 1800s turned North America into a world center for vertebrate paleontology At the same time the United States emerged as the world s largest industrial economy and creatures like Tyrannosaurus Brontosaurus and Triceratops became emblems of American capitalism Large fierce and spectacular American dinosaurs dominated the popular imagination making front page headlines and appearing in feature films Assembling the Dinosaur follows dinosaur fossils from the field to the museum and into the commercial culture of North America s Gilded Age Business tycoons like Andrew Carnegie and J P Morgan made common cause with vertebrate paleontologists to capitalize on the widespread appeal of dinosaurs using them to project American exceptionalism back into prehistory Learning from the show stopping techniques of P T Barnum museums exhibited dinosaurs to attract entertain and educate the public By assembling the skeletons of dinosaurs into eye catching displays wealthy industrialists sought to cement their own reputations as generous benefactors of science showing that modern capitalism could produce public goods in addition to profits Behind the scenes museums adopted corporate management practices to control the movement of dinosaur bones restricting their circulation to influence their meaning and value in popular culture Tracing the entwined relationship of dinosaurs capitalism and culture during the Gilded Age Lukas Rieppel reveals the outsized role these giant reptiles played during one of the most consequential periods in American history Praise for Assembling the Dinosaur A penetrating study of legitimacy and capitalism in the realm of fossils Verlyn Klinkenborg The New York Review of Books A solid entry into the growing body of literature on Gilded Age American paleontology but it is particularly valuable for its contribution to enhancing our understanding of how science and its representation during that

period were influenced by and in turn affected society as a whole By incorporating cultural economic and scientific developments Rieppel shines new light on the history of both American paleontology and museum exhibition practice Ilja Nieuwland Science **These Were People Once** Damien Huffer, Shawn Graham, 2023-09-15 People buy and sell human remains online Most of this trade these days is over social media In a study of this bone trade how it works and why it matters the authors review and use a variety of methods drawn from the digital humanities to analyze the sheer volume of social media posts in search of answers to questions regarding this online bone trade The answers speak to how the 21st century understands and constructs heritage more generally each person their own expert yet seeking community and validation and like the major encyclopedic museums built on a kind of digital neocolonialist othering of the dead *TV Snapshots* Lynn Spigel, 2022-04-08 In *TV Snapshots* Lynn Spigel explores snapshots of people posing in front of their television sets in the 1950s through the early 1970s Like today's selfies TV snapshots were a popular photographic practice through which people visualized their lives in an increasingly mediated culture Drawing on her collection of over 5 000 TV snapshots Spigel shows that people did not just watch TV women used the TV set as a backdrop for fashion and glamour poses people dressed in drag in front of the screen and in pinup poses people even turned the TV setting into a space for erotic display While the television industry promoted on screen images of white nuclear families in suburban homes the snapshots depict a broad range of people across racial ethnic and class backgrounds that do not always conform to the reigning middle class nuclear family ideal Showing how the television set became a central presence in the home that exceeded its mass entertainment function Spigel highlights how TV snapshots complicate understandings of the significance of television in everyday life [The Hidden Habits of Genius](#) Craig Wright, 2020-10-06 Noting fourteen key traits of genius Yale University's Genius Course creator explores what we can learn from brilliant minds that have changed the world Beethoven Picasso Jobs The word genius evokes these iconic figures whose cultural contributions have irreversibly shaped society Yet Beethoven could not multiply Picasso couldn't pass a 4th grade math test And Jobs left high school with a two sixty five GPA What does this say about our metrics for measuring success and achievement today Why do we teach children to behave and play by the rules when the transformative geniuses of Western culture have done just the opposite And what is genius really Professor Craig Wright has devoted more than two decades to exploring these questions and probing the nature of this term which is deeply embedded in our culture In *The Hidden Habits of Genius* he reveals what we can learn from the lives of those we have dubbed geniuses past and present Examining the lives of transformative individuals ranging from Charles Darwin and Marie Curie to Leonardo Da Vinci and Andy Warhol to Toni Morrison and Elon Musk Wright identifies more than a dozen drivers of genius characteristics and patterns of behavior common to great minds throughout history He argues that genius is far more complex than intellect and work ethic and that the famed eureka moment is a Hollywood fiction Brilliant insights that change the world are never sudden but rather they are the result of unique modes of thinking

and lengthy gestation Most importantly the habits of mind that produce great thinking and discovery can be actively learned and cultivated and Wright shows us how Adoption and Assisted Reproduction Madelyn Freundlich,2001 The controversies in adoption have extended across a spectrum of policy and practice issues and although the issues have become clear resolution has not been achieved nor has consensus developed regarding a framework on which to improve the quality of adoption policy and practice This book is the fourth in a series to use an ethics based framework for analyzing and resolving these complex challenges in adoption while avoiding the divisiveness that has heretofore impeded their resolution This book raises the question of whether assisted reproduction including sperm donation egg donation and embryo transfer which may result in a child who is not genetically related to one or both parents creates a situation that is analogous to adoption The book examines whether the knowledge acquired in the field of adoption should be applied in the area of assisted reproduction and whether issues in adoption such as identity access to background information and search are equally applicable in the context of reproductive technology The chapters are 1 Infertility Assisted Reproduction and Adoption 2 The Meaning of Parenthood in Assisted Reproduction and Adoption 3 The Parties Served through Adoption and Assisted Reproduction 4 Anonymity and Information Access 5 Market Forces in Adoption and Assisted Reproduction 6 Embryo Donation and Adoption and 7 The Law of Adoption and Assisted Reproduction The concluding chapter notes that the limited research in assisted reproduction has made it difficult to determine the relative risks and benefits of a number of aspects of current practice and that identifying the key issues can serve as a first step toward full discussion of the challenges faced by professionals in adoption and assisted reproduction Contains 181 references KB *Second Opinion* Bruce Hilton,2001 Bruce Hilton director of the National Center for Bioethics discusses the moral questions involved in medicine and science The text intended for the general reader covers such topics as alternative reproductive technology DNA health care reform mental health refusing treatment and violence **Abraham Lincoln's DNA and Other Adventures in Genetics** Philip Reilly,2000 For laypeople and professionals alike who yearn for a better understanding of genetically engineered crops DNA fingerprinting cloning or gene therapy here is a valuable addition to a small but critical literature that will frame the public discourse as it is decided how to use the burgeoning knowledge of the genome The lessons are delivered in the course of fascinating historical tales including an especially enjoyable chapter on Henri de Toulouse Lautrec with a hint of Lewis Thomas like awe and fascination with the power of genetic analysis **Time** ,1999 Family News from Dr. James Dobson ,1996 **The Spectator** ,2011 The Biology of Business John Henry Clippinger,1999-10 An introduction to the Complex Adaptive System CAS of management a system that takes into account all of the variables that have an impact on modern enterprises and allows managers to take control from the bottom up Jacket What is Your Dangerous Idea? and Steven Pinker      **The Humble Little Condom** Aine Collier,2007 This unique history provides an intriguing glimpse into human sexual habits customs beliefs and attitudes surrounding a prophylactic device that goes back to at least the ancient Egyptians The author includes many fascinating historical details such as Clergymen of the Middle Ages left records of birth control methods that worked When women had few choices in the world of commerce a significant number found a legitimate and profitable business niche producing and selling sheaths During the Great Depression while other businesses went bankrupt condom manufacturers found themselves doing a booming trade throughout the 1930s one of Wall Street s few successes AIDS has brought the condom full circle Not for the first time in history has the little device been vilified as a promoter of dirty illicit sex and lauded as a life saving device Thoroughly researched yet presented in a witty enjoyable style The Humble Little Condom is both an entertaining read and an educational impeccably researched popular history      *The New York Times Magazine* ,2004      Acronyms, Initialisms & Abbreviations Dictionary Gale Research Company,1997

**Media** W. Lambert Gardiner,2006 In the tradition of Harold Innis and Marshall McLuhan Professor Scott Gardiner approaches media as an extra somatic tool and engages in a bracingly different approach to the purpose and power of media via an investigation into its historical psychological and technical underpinnings as well as the powerful and disturbing benign configurations of its future Gardiner goes beyond the usual sociological level of analysis and the readings approach to the topic Media in all forms is seen as an extension of memory and speech what we are born with if medium is defined as storing and transmitting information Next the development of storing information outside our bodies is analyzed reading writing photography and film for transmitting information outside our bodies telephone radio television and for both storing and transmitting outside our bodies internet multimedia Futurity and the limits of Media conclude the study A well known Canadian researcher and scholar Gardiner is the author of numerous books and articles on the Media and worked with Innis and McLuhan at the Toronto School of Media A powerful overview of the subject and its and our mediatised future recommended both for its content as well as for its lively and sophisticated presentation Professor Ernst Bekovsky      The Wall Street Journal ,2009      **Searchlight** ,2006
