Ebays On Consumer Cooperatives:

Economic Justice and Democracy Robin Hahnel, 2013-05-13 In *Economic Justice and Democracy* Robin Hahnel argues that progressives need to go back to the drawing board and rethink how they conceive of economic justice and economic democracy. He presents a coherent set of economic institutions and procedures that can deliver economic justice and democracy through a participatory economy. But this is a long run goal; he also explores how to promote the economics of equitable cooperation in the here and now by emphasizing ways to broaden the base of existing economic reform movements while deepening their commitment to more far reaching change. Proceedings of the Sixth International Symposium on Human Aspects of Information Security & Assurance (HAISA 2012) Nathan Clarke, Steven Furnell, 2012 The Human Aspects of Information Security and Assurance HAISA symposium specifically addresses information security issues that relate to people. It concerns the methods that inform and guide users' understanding of security and the technologies that can benefit and support them in achieving protection. This book represents the proceedings from the 2012 event which was held in Crete, Greece. A total of 19 reviewed papers are included, spanning a range of topics including the communication of risks to end users, user centred security in system development and technology impacts upon personal privacy. All of the papers were subject to double blind peer review with each being reviewed by at least two members of the international programme committee.

Consumer Culture and Society Wendy Wiedenhoft Murphy, 2016-07-27 The author is a proud sponsor of the 2020 SAGE Keith Roberts Teaching Innovations Award, enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. *Consumer Culture and Society* offers an introduction to the study of consumerism and mass consumption from a sociological perspective. It examines what we buy, how and where we consume, the meanings attached to the things we purchase, and the social forces that enable and constrain consumer behavior. Opening chapters provide a theoretical overview and history of consumer society, and featured case studies look at mass consumption in familiar contexts such as tourism, food, and higher education. The book explores ethical and political concerns, including consumer activism, indebtedness, alternative forms of consumption, and dilemmas surrounding the globalization of consumer culture.

Motivating Cooperation and Compliance with Authority Brian H. Bornstein, Alan J. Tomkins, 2015-04-29 This volume explores the various ways in which trust is thought about and studied in contemporary society. In doing so, it aims to advance both theoretical and methodological perspectives on trust. Trust is an important topic in this series because it raises issues of both motivation and emotion. Specifically, notions of trust and fairness motivate individuals to behave in a manner they deem appropriate when responding to governmental authority. On the emotions-related side, individuals have emotional responses to institutions with authority over their lives, such as the city government or the Supreme Court, depending on whether they perceive the institutions as legitimate. The public's trust and confidence in governmental institutions are frequently claimed as essential to the functioning of democracy, spawning considerable research and

commentary For those in the law and social sciences the tendency is to focus on the criminal justice system in general and the courts in particular However other public institutions also need trust and confidence in order not only to promote democracy but also to assure effective governance facilitate societal interactions and optimize organizational productivity Not surprisingly therefore important research and commentary is found in literatures that focus on issues ranging from social sciences to natural resources from legislatures to executive branch agencies from brick and mortar businesses to online commerce from health and medicine to schools from international development to terrorism etc This volume integrates these various approaches to trust from these disciplines with the goal of fostering a truly interdisciplinary dialogue By virtue of this interdisciplinary focus the volume should have broad appeal for researchers and instructors in a variety of disciplines psychology sociology political science criminal justice social justice practitioners economics and other areas
