Echo Chambers:

An Introduction to the Ethics of Social Media Douglas Campbell, 2025-09-23 Doug Campbell lays out a comprehensive and fair minded account of both the benefits and the drawbacks of social media for our era He attaches these evaluations to both the individual and to society as a whole The case studies are compelling and exhibit a keen awareness of the current moment How should we live now that many or even most of us are at least partially online Campbell addresses this question from the point of view of privacy attention politics misinformation online ostracism online friendship and the potential benefits of simply quitting social media or at least some of its more pernicious platforms Along the way Campbell ties his discussions back to philosophical concerns raised by Plato Aristotle and Xunzi among others He also connects his discussion with recent work in feminist philosophy And each chapter concludes with a succinct definition of key terms and suggested case studies and discussion topics that will engage students at all levels An impressive accomplishment and one that deserves a place in the classroom Mark Alfano Macquarie University

Spatializing Social Media Marco Bastos, 2021-08-19 Spatializing Social Media charts the theoretical and methodological challenges in analyzing and visualizing social media data mapped to geographic areas It introduces the reader to concepts theories and methods that sit at the crossroads between spatial and social network analysis to unpack the conceptual differences between online and face to face social networks and the nonlinear effects triggered by social activity that overlaps online and offline The book is divided into four sections with the first accounting for the differences between space the geometrical arrangements that structure and enable forms of interaction and place the mechanisms through which social meanings are attached to physical locations The second section covers the rationale of social network analysis and the ontological differences stating that relationships more than individual and independent attributes are key to understanding of social behavior The third section covers a range of case studies that successfully mapped social media activity to geographically situated areas and considers the inflection of homophilous dependencies across online and offline social networks The fourth and last section of the book explores a range of networks and discusses methods for and approaches to plotting a social network graph onto a map including the purpose built R package Spatial Social Media The book takes a non mathematical approach to social networks and spatial statistics suitable for postgraduate students in sociology psychology and the social sciences

Loving Our Enemies Through Seasons of Bitterness Lex Kohn, 2025-06-30 In a nation crumbling under the weight of bitterness where government is the people's god the way through is neither legislation nor activism but loving the least loveable A study of internet influence conflict theory and nineteenth century wisdom reveals that people do not have to solve their disagreements if they can relearn how to love their enemies as Christ commanded This book highlights courageous men and women of faith from biblical times up through the present who obeyed this commandment the Scriptures they followed and how they managed it so that people today too might learn to substitute love instead of bitterness

news sexual predators vs me too ers foreign businesses vs American businesses Trumpists vs never Trumpers Why It s easy and convenient to blame President Trump but he is more a catalyst than a cause of the problem He is one of the factors that are outside of us as human beings as is income inequality immigration racism and advancing technology These exogenous causes of tribalism in their various forms occupy a huge slice of the daily news cycle Most people if presented with the phrase echo chamber will associate it with left or right leaning media networks MSNBC and FOX respectively Each side broadcasts news and opinions over and over that agrees with their slant and ignores or underrepresents views that are opposed And we humans not only passively inhale one sided information we actively seek out news which is consistent with what we believe and interact with people who agree with us whether in real life or on social media Time and repetition harden our views But here s the wrinkle in general how often do we change our minds about anything Not often and only with great difficulty We hold beliefs that are extremely resistant to change be they related to politics and religion devotion to a sports team or musical genre or even favorite cuisine or style of dress The way we humans are wired comprised of a nexus of beliefs or constructs self interest honed by evolution and logical thinking serve to make each of us fairly predictable and not very open to change We are each of us our own unique one off echo chamber
