Drawing Instruments John Lyles,2019-12-20 Originally developed in 1993 for an auction of an Architect s private collection
of over 1 500 drawing instruments and calculators this extensive book is one of a few comprehensive references available for
comparative study of these instruments The original collection was assembled over a twelve year period from sources in the
US and Europe Each instrument is listed in a scientific format for comparative evaluation and identification An abbreviations
table supports this approach Profusely illustrated with 113 color photos and 61 highly organized text pages The Subject
Index has over 400 individual references dissecting this impressive collective of instruments from the 18th C thru the mid
20th century Instruments are categorized by Maker Country Period of Manufacture and function Different instrument makers
and suppliers are referenced to over 300 individual items The four page Table of Contents provides a logical and extremely
useful subjective summary of the catalog contents so that whatever the instrument or drawing tool its location can be easily
found The photographs were taken with the idea of showing these important instruments in a comparative array Researchers
and collectors will find this a valuable resource These instruments represent a most prolific period of time in our history of
invention and advancements in technology Computers are the new tools which demand a new pace of design and
documentation They leave behind the centuries of drawing instruments that were the connection from the hand to the paper
