Eclipse Of Darwinism:

The Eclipse of Darwinism Peter J. Bowler, 1983 In this pioneering study of the first major challenges to Darwinism Peter J Bowler examines the competing theories of evolution identifies their intellectual origins and describes the process by which the modern concept of evolution emerged Describing the variety of influences that drove scientists to challenge Darwin's conclusions Bowler reevaluates the influence of social forces on the scientific community and explores the broad philosophical ideological and social implications of scientific theories

[Revisiting the Eclipse of Darwinism](#) Michał Jakub Wagner, 2024-11-01 This book focuses on a critical reexamination of two prominent categories used in modern historiography of biology the eclipse of Darwinism and the modern synthesis The main objective is to critically analyze the main existing interpretations of the eclipse of Darwinism and emergence of the modern synthesis with particular emphasis on the philosophical assumptions adopted in these interpretations Thus interpretations by Ernst Mayr Peter Bowler Mark Largent and modern historians who challenge these perspectives are discussed and critically evaluated The analysis of the above interpretations makes it possible to determine how the philosophy of science limits the interpretation of the history of a given field and also serves as a starting point for proposing an original interpretation of the above period in the history of evolutionary biology The ultimate goal will therefore be a proposal of a new interpretative perspective to answer following questions Why did the eclipse of Darwinism occur How should its origins be understood Why did it end and why did the modern synthesis emerge Main thesis of this book is that the eclipse was a direct response to inconsistent ontology upon which Darwin built his theory of evolution Darwin referred to terms and concepts rooted in the philosophy of essentialism which was problematic because he tried to apply these essentialist concepts to his vision of the ever changing nature Therefore all of the anti Darwinian theories characteristic to the eclipse of Darwinism and later to the modern synthesis were produced in an attempt to reconcile essentialism with evolution and thus to correct Darwin's philosophical error The book will appeal to biologists philosophers and historians alike

The Eclipse of Darwinism. Anti-Darwinian Evolution Theories in the Decades Around 1900 Peter J. Bowler, 1983

Descended from Darwin Joe Cain, Michael Ruse, 2009-01-01 This vol has its origins in a conference held October 22-23 2004 at the Amer Philosophical Society APS Library Phila The main focus was on evolutionary studies in America before during and after the famous synthesis period of the 1930s and 1940s The synthesis period has been the focus of substantial new research and important new thinking This vol brings together 15 specialists to explore these developments and to press further Questions shaping these essays focus on the following broad themes Continuity and breaks across generations Emerging narratives for the period New research opportunities at the APS New ideas from the research front

Placing evolutionists in the broader context of biology and Future directions Also includes a thoughtful intro by Michael Ruse

Branching Darwinisms: The Rise and Fall of the Eclipse Metaphor in the Historiography of Evolutionary Biology David Ceccarelli,2026-01-07 This book offers a meta historical analysis of the eclipse of Darwinism narrative in evolutionary biology It examines major historiographical labels such as Darwinism anti Darwinian eclipse of Darwinism and modern synthesis highlighting their varying uses in past and current historiography This analysis not only invites a rethinking of how evolutionary biology s development is periodized but also clarifies how historical narratives shape modern scientific practice by revealing the link between scientific practice and historical interpretation Using a historical and epistemological perspective the volume explores both the history of the eclipse period and how evolutionary biologists and historians have written that history Its methodology integrates the study of historiographical traditions with analyses of scientific writings popular accounts and personal correspondence among scholars The book concludes that the eclipse metaphor has lost heuristic value and that dividing biology into pre and post synthetic phases is misleading Darwinism neither entered the 1880s 1920s as a unified program nor simply fragmented into isolated strands Instead evolutionary studies comprised diverse traditions that branched out and progressively specialized

Assessment of the Nineteenth Century Debate that the Origin of Species engendered Alexander Syder,2014-12-18 Essay from the year 2014 in the subject History Basics grade 2 1 University of Lincoln University of Lincoln course History language English abstract The following essay presents an assessment of the Nineteenth Century Debate that the Origin of Species engendered

The Reception of Charles Darwin in Europe Eve-Marie Engels,Thomas F. Glick,2009-02-03 Charles Darwin is a crucial figure in nineteenth century science with an extensive and varied reception in different countries and disciplines His theory had a revolutionary impact not only on biology but also on other natural sciences and the new social sciences The term Darwinism already popular in Darwin s lifetime ranged across many different areas and ideological aspects and his own ideas about the implications of evolution for human cognitive emotional social and ethical capacities were often interpreted in a way that did not mirror his own intentions The implications for religious philosophical and political issues and institutions remain as momentous today as in his own time This volume conveys the many sidedness of Darwin s reception and exhibit his far reaching impact on our self understanding as human beings

Darwinism and the Divine in America Jon H. Roberts,2001 This title provides a comprehensive analytical overview of public dialogue among 19th century American Protestant intellectuals who struggled with the theory of organic evolution Arguments over the scientific merits of Darwin s theory gave way to discussions of its theological implications

Unity and Disunity in Evolutionary Biology Richard G. Delisle,Maurizio Esposito,David Ceccarelli,2024-09-02 It is not uncommon to see in major areas of research concerned with science that historical studies are accompanied by the rise of complementary or contradictory historiographies With time it seems scholars discover new approaches to study topics thus questioning old concepts traditions periodizations and

historical labels Apparently this has not been the case in evolutionary thought In that area the main historiographic labels such as Darwinian Revolution Eclipse of Darwinism and Modern Synthesis have been in place and largely uncontested for about 50 years Such labels seem to work as irrefutable and often hidden premises of many historical reconstructions philosophical analyses and scientific conceptualizations This volume aims to move beyond this state of affair opening new thinking avenues by revisiting the traditional historiography and laying the groundwork for establishing a new historiography that considers the intertwined threads that compose evolutionary biology Notably evolutionary studies seem to have been marked by the tension between unification attempts and the proliferation of approaches methodologies and styles of thinking As the contributors to this volume illustrate research traditions branched off throughout the history of evolutionary thought before and after Charles Darwin The resulting complexity challenges traditional thinking categories throwing a somewhat different light on a more recent label like the Extended Evolutionary Synthesis More than 40 years after the now classic *The Evolutionary Synthesis Perspectives on the Unification of Biology* 1980 edited by Ernst Mayr and William Provine the contributors to this volume aim to reevaluate where evolutionary biology stands today [Perspectives on the Popularisation of Natural Sciences in a Diachronic Overview](#) Eleonora Chiavetta, Silvana Sciarrino, 2014-05-02 This volume combines strands of research currently being debated in linguistic scholarship such as the issue of specialized discourse the issue of knowledge dissemination and the issue of the versatility of genres It presents some of the relevant findings of an Italian National Research Project focusing on specialized discourse which involved researchers and scholars from several Italian universities Discursive popularisation is here analysed with regard to the domain of natural sciences particularly focusing on botany and gardening Another relevant feature of the book is the diachronic approach used in discussing the issue of popularisation The authors of the volume focus on their research following their own methodological choices and as such investigate critical discourse analysis genre analysis and corpus analysis All the authors however apply a diachronic perspective to their study Chapters therefore span from the dissemination of science in the 17th century English scientific community through the Late Modern English Period to the end of the 19th century throughout the 20th century up to the present day Within the common frame of natural sciences each author develops a specific topic such as Irish botanical terminology the development of garden notebooks the manipulation of Darwin's theory of evolution the role played by the Puritans in promoting a plain and clear English scientific prose Darwinism in the 20th and 21st century British press and scientific popularisation in Nobel lectures [Journal of the Experimental Analysis of Behavior](#) ,1987 **Theological and Scientific Commentary on Darwin's Origin of Species** Ted Peters, Martinez Joseph Hewlett, 2008 Although modified and adapted evolution's basic principles remain firmly in place However the implications for belief are still being sorted In this book the authors review Darwin's milieu and give an overview of the conflicts among today's interpreters of Darwin **BOOK JACKET Science** ,1923 Vols for 1911-13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018-0120 1st-15th meeting

Common sense and logic applied to Darwinism and teleology... David MacDill, 1899 **Darwinism and the Linguistic Image** Stephen G.
