staining reactions of inclusions Of the 27 groups that contain viruses infecting legumes in nature inclusions are diagnostic at the group level in 15 of these groups Plant breeders diagnosticians plant virologists and students of plant virology will find this an indispensable guide to legume viruses

Virus Taxonomy Andrew MQ King, Elliot Lefkowitz, Michael J. Adams, Eric B. Carstens, 2011-11-10 The practical need to partition the world of viruses into distinguishable universally agreed upon entities is the ultimate justification for developing a virus classification system Since 1971 the International Committee on Taxonomy of Viruses ICTV operating on behalf of the world community of virologists has taken on the task of developing a single universal taxonomic scheme for all viruses infecting animals vertebrate invertebrates and protozoa plants higher plants and algae fungi bacteria and archaea The current report builds on the accumulated taxonomic construction of the eight previous reports dating back to 1971 and records the proceedings of the Committee since publication of the last report in 2005 Representing the work of more than 500 virologists worldwide this report is the authoritative reference for virus organization distinction and structure

Handbook of Plant Virus Diseases Dragoljub D. Susic, Richard E. Ford, Malisa T. Tomic, 1999-06-15 Handbook of Plant Virus Diseases presents basic information about viral caused and viral like diseases in many cultivated crops The editors internationally known plant pathologists provide authoritative descriptive symptomatic signatures of virus diseases to aid in the diagnosis and possible control of viruses This handbook organizes cultivated plants into groups according to their final destinations and uses after harvest a useful grouping system that indicates that some diseases their resultant epidemiology and control measures are characteristic within different groups
