Emmett, 2006
This critically acclaimed biographical dictionary of American economists offers in depth biographies of the most important economic figures in American history from the seventeenth century to the present day. All of the major schools of American economic thought are represented from the Constitutional school to the Keynesian school, and the dictionary includes in depth coverage of the many overlooked women who have influenced economic thought in America. [Who's who in Economics](#) Mark Blaug, 1986
This edition includes 337 more entries bringing the total to over 1,400 thumbnail sketches of economists who have contributed to the literature over the past three centuries. [A History of Feminist and Gender Economics](#) Giandomenica Becchio, 2019-10-30
This book offers a historical exploration of the genesis of feminist economics and gender economics as well as their theoretical and methodological differences. Its narrative also serves to embed both within a broader cultural context. Although both feminist economics and gender neoclassical economics belong to the cultural process related to the central role of the political economy in promoting women's emancipation and empowerment, they differ in many aspects. Feminist economics, mainly influenced by women's studies and feminism, rejected neoclassical economics, while gender neoclassical economics, mainly influenced by home economics and the new home economics, adopted the neoclassical economics approach to gender issues. The book includes diverse case studies which also highlight the continuity between the story of women's emancipation and the more recent developments of feminist and gender studies. This volume will be of great interest to researchers and academia in the fields of feminist economics, gender studies, and the history of economic thought. **A Biographical Dictionary of Australian and New Zealand Economists** John Edward King, 2007
