Absorption Johannes Bronkhorst, 2012 This book argues for the central role played by absorption in the functioning of the human mind The importance of absorption makes itself felt in different ways the two studies combined in this book concentrate on two of them The first study argues that largely as a result of language acquisition humans have two levels of cognition which in normal circumstances are simultaneously active Mental absorption is a or the means to circumvent some perhaps all of the associations that characterize one of these two levels resulting in what is sometimes referred to as mystical experience but which is not confined to mysticism and plays a role in various religious phenomena and elsewhere The second study takes as point of departure some puzzling statements in the early

Buddhist canon that raises serious questions of a psychological nature An essential element in the psychological theory proposed is the observation that mental absorption is a source of pleasure Since the human mind is in large part guided by pleasure which it seeks to repeat states of absorption leave memory traces that subsequently direct the mind However these memory traces do not recall the states of absorption themselves but rather the objects or circumstances that accompanied them The resulting activity of the mind differs in this way from person to person and can pursue wildly diverging goals
