

THE EVOLUTION OF CHESS

The Inception of Chaturanga

The roots of chess trace back to the ancient Indian game Chaturanga. This early version of chess, played on an 8x8 grid, served as a battle simulator incorporating elements of Indian military.

4th Century

The Birth of Modern Chess

As chess spread throughout the Middle Ages, the rules were further modified to create the game we know today. Around the late 13th century, the pawns of the queen, bishop, and knight were significantly reworked, leading to faster, more dynamic gameplay.

15th Century

7th Century

With the spread of Islam into Persia, Chaturanga was adapted into a game known as Shatranj. This version of the game began to resemble modern chess more closely, though the movements of pieces and the rules differed.

Evolution into Shatranj

The Rise of Computer and Online Chess

The late part of the 20th century saw the development of computer chess, culminating in IBM's Deep Blue defeating the reigning world champion, Garry Kasparov, in 1997. In the 21st century, online chess platforms have expanded the game globally, while advanced chess engines like Stockfish and Leela Alpha have changed how players study and understand the game.

21st Century

19th Century

The first international chess tournament was held in London in 1851. This period also saw the standardization of rules across different countries, facilitated by the establishment of chess organizations.
