Southworth,1921 *Sources for the History of Emotions* Katie Barclay, Sharon Crozier-De Rosa, Peter N. Stearns, 2020-06-03
Offering insights on the wide range of sources that are available from across the globe and throughout history for the study of the history of emotions this book provides students with a handbook for beginning their own research within the field. Divided into three parts *Sources for the History of Emotions* begins by giving key starting points into the ethical, methodological and theoretical issues in the field. Part II shows how emotions historians have proved imaginative in their discovering and use of varied materials considering such sources as rituals, relics and religious rhetoric, prescriptive literature, medicine, science and psychology and fiction while Part III offers introductions to some of the big or emerging topics in the field including embodied emotions, comparative emotions and intersectionality and emotion. Written by key scholars of emotions history the book shows readers the ways in which different sources can be used to extract information about the history of emotions highlighting the kind of data available and how it can be used in a field for which there is no convenient archive of sources. The focused discussion of sources offered in this book which not only builds on existing research but encourages further efforts makes it ideal reading and a key resource for all students of emotions history.

History McLennan Library. Reference Department, 1973 *History and Economic Life* Georg Christ, Philipp R. Rössner, 2020-02-27 *History and Economic Life* offers students a wide ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century. Having identified an ever widening gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians the book aims to bridge the divide by making economic history sources more accessible to students and the wider public and highlighting the need for a complementary rather than exclusive approach. Divided into two parts the book begins by equipping students with a toolbox to approach economic history sources considering the range of sources that might be of use and introducing different ways of approaching them. The second part consists of case studies that examine how economic historians use such sources helping readers to gain a sense of context and understanding of how these sources can be used. The book thereby sheds light on important debates both within and beyond the field and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis. Introducing sources often avoided in culturally minded history or statistically minded economic history courses respectively and advocating a combined quantitative and qualitative approach it is an essential resource for students undertaking source analysis within the field.
