Cosmic Consciousness Richard Maurice Bucke, 1901-10-05 This classic study in the evolution of the human mind is a pioneering work as valuable today as when it was first published in 1901 At that time it was enthusiastically acclaimed by both William James and P D Ouspensky It has long been accepted as a landmark in the field of mysticism In reviewing the mental and spiritual activity of the human race Dr Bucke discovers that at intervals certain individuals have appeared who are gifted with the power of transcendent realization or Illumination Their experiences constitute a definite advance in man's relation with the Infinite Moreover the author shows from available records that this transfiguring endowment of Illumination is on the increase and he gives full details of practically all the cases on record up to the time when the book was written

**Seeing Red** Nicholas Humphrey, 2006-03-31 Consciousness matters Arguably it matters more than anything The purpose of this book is to build towards an explanation of just what the matter is Nicholas

Humphrey begins this compelling exploration of the biggest of big questions with a challenge to the reader and himself What is involved in seeing red What is it like for us to see someone else seeing something red Seeing a red screen tells us a fact about something in the world But it also creates a new fact a sensation in each of our minds the feeling of redness And that is the mystery Conventional science so far hasn't told us what conscious sensations are made of or how we get access to them or why we have them at all From an evolutionary perspective what is the point of consciousness Humphrey offers a daring and novel solution arguing that sensations are not things that happen to us they are things we do originating in our primordial ancestors expressions of liking or disgust Tracing the evolutionary trajectory through to human beings he shows how this has led to sensations playing the key role in the human sense of Self The Self as we now know it from within seems to have fascinating otherworldly properties It leads us to believe in mind body duality and the existence of a soul And such beliefs even if mistaken can be highly adaptive because they increase the value we place on our own and others lives Consciousness matters Humphrey concludes with striking paradox because it is its function to matter It has been designed to create in human beings a Self whose life is worth pursuing

**A Study of Time in Indian Philosophy** Anindita Niyogi Balslev, 2009-01-01 Since its first publication *A Study of Time in Indian Philosophy* has been acclaimed as having successfully shown the simple falsity of such clichés that the Indian view of time is cyclic or that it is exclusively illusory Given the variety of views discussed in this work it is evident that the theme of time is intimately related to such basic concepts as being and becoming change and causality creation and annihilation It has been therefore observed that this book makes an excellent introduction to the heart of Indian thought Based on Sanskrit source material this book is a unique attempt to presenting a comprehensive review of the widely divergent views about time in Indian thought Clearly written it succeeds in setting out the issues of discussion pointedly and cogently Since the concept of time intervenes with such major concepts as that of causality being and non being etc this book also serves as a general introduction to the classic heart of Indian Philosophy The author has demonstrated a rare ability to translate technical doctrines from one tradition of thought into the language of another and thus has made it possible for all those who are concerned with the question of time but do not have access in the Indian conceptual world to appreciate the contributions of Indian thought with regard to this complex question Noteworthy is the fact that this book is the first attempt which successfully exposes the simple falsity of such clichés as that the Indian view of time is cyclic as opposed to the Judaeo Christian understanding of linear time *A Study of Time in Indian Philosophy* therefore renders a valuable service to all those who are concerned with cross cultural and inter religious exchange

**A Study of Svatantrika** Donald S. Lopez Jr., 2016-09-13 *A Study of Svatantrika* represents an important contribution to our understanding of M dhyamika philosophy in India and Tibet The M dhyamika is considered to have two subschools Svatantrika and Prasangika The Prasangika school of Candrakirti is better known than Svatantrika in part because the major Sv

tantrika texts are preserved only in Tibetan translation The Sv tantrikas however made important contributions to Buddhist philosophy in their expositions of the nature of reality the role of reasoning in the process of enlightenment and in their delineations of the paths to nirvana The synthesis of Yog c ra and M dhyamika philosophy by the Sv tantrika master ntarak ita represents the final development of Buddhist thought in India In Tibet Sv tantrika was the first Indian Buddhist school to gain currency prior to the translation of the works of Candrak rti into Tibetan In preparing this Study of Sv tantrika Donald S Lopez Jr consulted the major Indian works of the Sv tantrikas figures central to the development of Buddhist thought in India such as Bh vaviveka J nagarbha ntarak ita and Kamala la and analyzed a number of Tibetan expositions of Sv tantrika The result is the most extensive examination of this influential school available in the West
