

further reading. Another aspect of his procedure is to be as objective as possible (p.38), without suppressing his own views (p.12). For example, his views have emerged from two essential sources : (i) the treatment of the insights of Saussure, Bloomfield, the Prague school, and the functionalists , and (ii) his critical evaluations of other trends ,like comparing the main features of glossematics and other trends of structural linguistics (p.69), and the notion of universals in rationalists and empiricists (p.136f). The other aspect is the particular way of titling his chapters and their sections . All the chapters (except the first two) are entitled by the name of the schools (like The Prague School (p.53) and The Copenhagen School (p.65)), or trends (like Functional Linguistics (p.92) and Structural Linguistics (p.110)). The first chapter is an introductory devoted to be an account of 'structuralism' and its three senses (p.35f). Chapter Two carried the name of Ferdinand de Saussure, and two reasons are behind this : (i) Saussure adopted a different and a more traditional view of the history of linguistics (p.37),and (ii) his dichotomies are adopted with and without criticism, like the dichotomy of synchrony/diachrony on the one hand and 'langage' , 'la langue' ,and 'parole' ,on the other (p.48). Titling sections is based on the name of the scholars (9 times) and the basic notions or terms in structural linguistics (17 times).Chapter VIII *Transformational Grammar* is one piece, in the sense that no sections are there.

Lepschy adopted the strategy of comparison in every chapter. This strategy has two faces: (i) comparing the notions among scholars of one trend as in Hjelmslev's theories with Uldall's theories (p.73) ,and (ii) comparing notions among scholars of different trends as in presenting Chomsky's criticism to the taxonomic linguistics of Bloomfield and his followers (p.118). This strategy is so fruitful, especially reference to the original data were stated in subscripts. Another way of comparison is represented by the illustrated, chronological treatment of notions or terms from the eighteenth century till the 1970s. Among those tackled were 'abstraction', 'structure', and the 'communicative 'function of language. For example a careful account was documented of the use of the term 'structure' in ancient and more recent authors in linguistics and other fields. Recently, the term 'structural' is not only to be restricted to the work of American linguistics ,but also designates those trends tied to gain insight into the structural and systematic character of language (p.36). Lepschy adopted this argument in two ways: (i) the validity of the structural principles ,regardless diversity in realization ,as in the notion of 'la langue' in Saussure on the one hand , and Bloomfield and others ,on the other ;and (ii) the claim that Chomsky is 'an heir' to twentieth- century linguistics , and ,as one of its most interesting developments (p.37 ,137).

Suffice to sum up, Lepschy's *SURVEY* is a suitable book for those wanted to gain a comprehensive, but illustrative account of structuralism in Europe and America. Examples from the original sources are cited, with their original languages. Lepschy tried to be objective in his book , but moved to be subjective in the last two chapter where Chomsky 's developing theories and their twentieth century realizations in mathematical or statistical linguistics and machine translation are considered. This classical, masterpiece treatment of structuralism is also written in simple and concise way, and that is one of its strength to the extent to be mentioned in majority of Wikipedia's entries on the one hand , and as a suggested reading in all introductions to linguistics, on the other.

A Survey Of Structural Linguistics

A Survey Of Structural Linguistics:

A Survey of Structural Linguistics Giulio Ciro Lepschy,1982 **A Survey to Determine the Influence of Structural Linguistics in the Classification of Four Parts of Speech in Twelfth-grade English Textbooks, 1960-1965** Ivy Chiyono West,1967 **Structural Linguistics and Human Communication** Bertil Malmberg,2012-12-06

The point of departure of this general survey of modern structural linguistics is the place of language in human relations Linguistics will consequently be understood as a science of communication My book is not intended as an elementary handbook The readers are supposed to be in the first place advanced students of linguistics and phonetics and of neighbouring fields where a real awareness of linguistic methods and problems is essential such as psychology phoniatrics speech therapy language teaching communication engineering The book may however be of some value also for the general reader who is interested in language in language learning or in communication processes It might finally serve as an introduction to structural theories and practice for those linguists of traditional orientation who would like to make contact with the new trends in the study of language It is self evident that under such circumstances any reader will find certain chapters in this book rather complicated others irritatingly elementary This is however unavoidable in a work whose aim is to cover a vast field of knowledge and to offer the reader a synthesis of what appears at first sight to be widely disparate facts and phenomena Many of the facts brought together here may regarded superficially seem to have few or no mutual connections They can nevertheless be combined into a wide humanistic and scientific unity within which numerous lines of relationship bind together physical and psychic individual and social phenomena
