Behavior and the Menstrual Cycle Richard C. Friedman,1982 *The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology* Lisa L. M. Welling,Todd K. Shackelford,2019-03-19 The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology offers a comprehensive and compelling review of research in behavioral endocrinology from an evolutionary perspective on human psychology Chapters written by renowned experts on human behavior explore a number of subtopics within one of three themes 1 development and survival 2 reproductive behavior and 3 social and affective behavior Such topics include hormonal influences on life history strategy mate choice aggression human hierarchical structure and mood disorders This Handbook is situated at the intersection of evolutionary psychology and behavioral endocrinology Its interdisciplinary approach makes it an important resource for a broad spectrum of researchers graduate students and advanced undergraduates who are interested in studying the motivations and mechanisms that affect behavior **Evolutionary Perspectives on Human Sexual Psychology and Behavior** Viviana A. Weekes-Shackelford,Todd K. Shackelford,2014-07-08 This volume in the Springer Series in Evolutionary Psychology presents a state of the art view of the topic of sexuality and sexual behavior drawing on theoretical constructs and research of noted individuals in the field Comprehensive and multi disciplinary this book seeks to provide a broad overview without sacrificing the complexity of a multi faceted approach The book is framed by introductory and closing sections that provide a context for the range of ideas contained within Ample space is provided in designated sections that focus on key areas of sexuality from both male and female perspectives and that include information from primate studies This volume can serve as a graduate text in sexual behavior in evolutionary terms and as a guide for further research **Behavior and the Menstrual Cycle** Richard C. Friedman,1982 *Individual Differences in Addictive Behaviors* Lucy J. Bloch,United States. National Aeronautics and Space Administration,1971 **Psychoendocrinology of Human Sexual Behavior** Harold Persky,1987-09-09 This up to date and important new work describes the relationship between psychological and hormonal factors found in human sexual behavior across the lifespan The author s discussion of human sexual behavior is organized according to developmental stage starting with the fetus and concluding with senescence Persky proposes that human sexual behavior is determined by a variety of factors e g social psychological and endocrine and ascertains the

relative contribution of each of these factors to a range of sexual behaviors attitudes and feelings Furthermore he provides documentation that these determinants are interrelated in reciprocal fashion In addition by organizing his material within the Life Development model Persky is able to present normal and abnormal psychoendocrine relationships which lead to sexual disorders
