Statistical Models and Analysis in Auditing: A Study of Statistical Models and Methods for Analyzing Nonstandard Mixtures of Distributions in Auditing Panel on Nonstandard Mixtures of Distributions, 1988-01-01

Contributions to Sampling Statistics Fulvia Mecatti, Pier Luigi Conti, Maria Giovanna Ranalli, 2014-06-02 This book contains a selection of the papers presented at the ITACOSM 2013 Conference held in Milan in June 2013. It is intended as an international forum of scientific discussion on the developments of theory and application of survey sampling methodologies and applications in human and natural sciences. The book gathers research papers carefully selected from both invited and contributed sessions of the conference. The whole book appears to be a relevant contribution to various key aspects of sampling methodology and techniques it deals with some hot topics in sampling theory such as calibration, quantile regression and multiple frame surveys and with innovative methodologies in important topics of both sampling theory and applications. Contributions cut across current sampling methodologies such as interval estimation for complex samples, randomized responses, bootstrap weighting, modeling imputation, small area estimation and effective use of auxiliary information. Applications cover a wide and enlarging range of subjects in official household surveys, Bayesian networks, auditing business and economic surveys, geostatistics and agricultural statistics. The book is an updated high level reference survey addressed to researchers, professionals and practitioners in many fields.

Auditing and Society Wally Smieliauskas, Minlei Ye, Ping Zhang, 2020-07-30 Auditing has become an essential component in market societies and the need for auditing skills has risen in line with globalization. This textbook provides a comprehensive overview of the role of financial statement auditing in contemporary society including the auditor's role in evaluating the financial reporting of an auditee, a topic of central concern in the recent comprehensive review of the auditing profession in the Brydon Report 2019. The experienced authors provide insight into auditing research to help readers understand its function, regulation and role in theory and practice. With focus on private sector financial statement auditing and its regulation, the book includes perspectives on social theory, history and the importance of professional standards. The thought provoking final chapter challenges students to consider the effectiveness of auditing in evaluating increasingly risky and complex accounting estimates involving assumptions about future events. A fundamental approach to auditing theory, this textbook will be useful reading for advanced undergraduate and postgraduate students across business and accounting fields.

Belief Functions in Business Decisions Rajendra P. Srivastava, Theodore J. Mock, 2013-11-11 The book focuses on applications of belief functions to business decisions. Section I introduces the intuitive, conceptual and historical development of belief functions. Three different interpretations: the marginally correct approximation, the qualitative model and the

quantitative model of belief functions are investigated and rough set theory and structured query language SQL are used to express belief function semantics Section II presents applications of belief functions in information systems and auditing Included are discussions on how a belief function framework provides a more efficient and effective audit methodology and also the appropriateness of belief functions to represent uncertainties in audit evidence The third section deals with applications of belief functions to mergers and acquisitions financial analysis of engineering enterprises forecast demand for mobile satellite services modeling financial portfolios and economics *Catalog of Copyright Entries.
