*Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl* Avery Library,1995      **CAD Principles for Architectural Design** Peter Szalapaj,2013-11-05 CAD Principles for Architectural Design is aimed at design students and practitioners interested in understanding how CAD is used in architectural practice This book makes connections between the basic operations that are common to most CAD systems and their use in practice on actual architectural design projects The ways in which CAD is integrated into the design processes of several leading edge practices is illustrated Arising from these case studies is the emergence of a contemporary phenomenon of integrated CAD in which all aspects of design schemes are brought together within computational frameworks that support the analysis of design proposals Szalapaj s view of CAD is one in which computers constitute a medium in which designers can express design ideas rather than viewing computers as problem solving machines For creative designers to successfully exploit CAD technology CAD systems should reflect designers intuitions as described by designers themselves      Building Skins Christian Schittich,2001 The external facades of a building are more than a protective mantle or an intelligent skin regulating temperature and light they also determine its very appearance By unusual choices of materials and the use of complex technology facades have become increasingly significant in recent years External surfaces are being perceived as an integral part of the building and are therefore being designed as such This volume focuses on the wide ranging aspects of facade design from the selection and use of materials to the advanced technical possibilities now open to the architect A wide array of carefully selected international examples show the theory in the practice All plans details and large scale sections of the facades have been researched with the high degree of competence typical of the editorial staff from the review Detail Expert authors provide the essential information needed to plan and design facades and elucidate on the latest developments in technology and materials      **The Best in Leisure and Public Architecture** Alan Phillips,1993      **Art Index Retrospective** ,1992      **Architecture D'aujourd'hui** Philip Jodidio,2004 This volume identifies the latest trends from Los Angeles to Tokyo and explains exactly how architecture is finding a new equilibrium where the old boundaries of space and function no longer exist      **European Contemporary Houses** Charles Bilas,1998 Amid the splendor of rocky or snow capped peaks green valleys and shimmering lakes homes in the mountains attract a wide range of people from sportspeople to poets The levels of today s techniques offer the boldest solutions bringing together humankind and nature This flowering of the best achievements of our epoch reflect the fertile imagination of the architects      □□□□□ ,1997      L'Architettura ,1998      **Controspazio** ,1994      **Espaces Et Sociétés** ,1992      *Niemcy wspólczesne* Hanka Dmochowska,1999      Il vuoto progettato Achille Maria Ippolito,1996      Architecture, mouvement, continuité ,      *Architecture for nature* Egbert Koster,1998 Biografie van het Instituut voor bos en natuuronderzoek in Wageningen waarin beschrijvingen van het ontwerp en bouwproces van het nieuwe gebouw afgewisseld worden met interviews van medewerkers over hun werk      Idee und Modell /Idea and Model Von Gerkan, Marg

und Partner,1994-06-07 Meinhard von Gerkan and Volkwin Marg are considered to be among the most acclaimed architects worldwide Their projects and completed works have in fact attracted international attention The present book focuses on the models produced over the years and therefore offers a unique look into the creative process of the architects Of primary importance is the quality of the designs and buildings which is already easily discernible in the models What is also perceptible is the need to maintain and further develop the high standards which had already distinguished the early projects The architects seek no short lived trends or superfluous effects on the contrary what they consider of utmost importance is their sense of social responsibility which in a firm of such dimensions is translated into no shallow pathos but rather into a daily commitment Architecture is an art that is applied in society The result is the product of a dialogue Meinhard von Gerkan Given the large number of the buildings and competition designs from among 256 award winning works 98 have received first prize not everything can be included in the annals of architectural history but the essential components of their work and that of their staff cannot be overlooked namely the attention to structural details the material oriented design and a simplicity based on usefulness all elements which in the best examples cited have attained a level of self evident naturalness
