

BELIEF SYSTEMS

DEFINITION

Belief systems are structured sets of principles or tenets held to be true by individuals or larger groups, encompassing aspects such as morality, life purpose, or empirical reality. They profoundly influence human behavior, shaping individual code of conduct, societal actions, values, and perceptions.

TYPES

Religious - These are belief systems that explain the origins of the universe, the existence of gods, and can set out moral codes.

Political - These are belief systems that explain how societies should be managed and governed, and are often based on ideas about power and resource distribution..
