**Bentham Crowel 1979-2009**, 2010 Critical seventies Martien de Vletter, 2004 There is no period in the history of the Netherlands which excites such emotion resistance or aversion as the decade of the 1970s Following in the wake of the democratization wave of 1968 some regard the 1970s as a period when pluralism was possible and desirable at all levels For others the crowning moment of 1968 degenerated into a quagmire of public consultation and a culture of always inconclusive committee meetings The 70s were either hip and groundbreaking or dogmatic and rigid The architecture of the time which headed off in pursuit of new definitions and forms is similarly divisive Though a number of architectural trajectories were driven by a devoted social engagement and a profound belief in architecture as a means of molding society the sheer plethora of movements failed to generate a single and unanimous alternative resulting instead in polarization and pluralism The Critical Years focuses on architecture urban planning and spatial planning from 1968 to 1982 Specific projects from the period are discussed and extensively documented on the basis of six themes and an introductory essay considers the context in which building and planning changed so radically With the imminent demolition and renovation of much of the infrastructure and architecture of the 1970s this book is a critical and timely document of one of the most important periods for architecture in the Netherlands Architecture, 1980 Gabriella Borsano, 1980 Samuel Danny Marc Santelli Serge Sattler Christoph Scolari Massimo Scott Brown Denise Silvetti Jorge Slovic David Gordon Smith Thomas Stern Robert Architects Taft T A U Th orie Architecture Urbanisme Terry Quinlan Tesar Heinz Thermes Laura Tigermann Stanley Timme Robert Howard Torre Susanna Turnbull William Tusquets Oscar Ungers Oswald Mathias Venezia Francesca Venturi Robert Van Kostelac Ante Josip Wilson Peter Wontroba Werner Christian Zenghelis Elia *A Century of Architecture in the Netherlands, 1880-1990* Joseph Buch, 1993 Dutch Art + Architecture Today, 1988-06 **Architectural Publications Index**, 1996

**20th Century Architecture in the Netherlands** Hans Ibelings, 1995 This richly illustrated book provides an

introduction to twentieth century Dutch architecture Ten concise chapters each covering a single decade discuss a selection of characteristic buildings referring to the major events and developments of each period Architectural history is not defined here as a cyclical succession of styles or generations but as a heterogenous collection of buildings and designs which are often based on equally differing approaches Apart from the internationally renowned masterpieces by architects like Berlage Oud Duiker Van Eyck and Koolhaas this book includes numerous lesser known buildings which underline the versatility and quality of Dutch architecture
