Russell the public campaigner The title of the volume is taken from one of his most famous and eloquent short essays and probably the best known of his many broadcasts for the BBC Man s Peril 1954 55 not only captures the essence of Russell s thinking about nuclear weapons and the Cold War in the mid 1950s its extraordinary impact served to jolt him into political protest once again **Truth in Fiction** John Woods,2018-02-23 This monograph examines truth in fiction by applying the techniques of a naturalized logic of human cognitive practices The author structures his project around two focal questions What would it take to write a book about truth in literary discourse with reasonable promise of getting it right What would it take to write a book about truth in fiction as true to the facts of lived literary experience as objectivity allows It is argued that the most semantically distinctive feature of the sentences of fiction is that they are unambiguously true and false together It is true that Sherlock Holmes lived at 221B Baker Street and also concurrently false that he did A second distinctive feature of fiction is that the reader at large knows of this inconsistency and isn t in the least cognitively molested by it Why it is asked would this be so What would explain it Two answers are developed According to the no contradiction thesis the semantically

tangled sentences of fiction are indeed logically inconsistent but not logically contradictory According to the no bother thesis if the inconsistencies of fiction were contradictory a properly contrived logic for the rational management of inconsistency would explain why readers at large are not thrown off cognitive stride by their embrace of those contradictions As developed here the account of fiction suggests the presence of an underlying three or four valued dialethic logic The author shows this to be a mistaken impression There are only two truth values in his logic of fiction The naturalized logic of Truth in Fiction jettisons some of the standard assumptions and analytical tools of contemporary philosophy chiefly because the neurotypical linguistic and cognitive behaviour of humanity at large is at variance with them Using the resources of a causal response epistemology in tandem with the naturalized logic the theory produced here is data driven empirically sensitive and open to a circumspect collaboration with the empirical sciences of language and cognition
