Ancient Marbles to American Shores Stephen L. Dyson, 2016-11-11 In *Ancient Marbles to American Shores* Stephen L. Dyson uncovers the history of classical archaeology in the United States by exploring the people and programs that gave birth to archaeology as a discipline in this country. He puts aside the common formula of chronicling great digs, great discoveries, and great men in favor of a cultural, ideological, and institutional history of the subject. The book explores the ways American contact with the monuments of Greece and Rome affected the national consciousness. It discusses how the spread of classical style laid the groundwork for the development of the discipline after the Civil War and examines the period before World War I when most of the institutions that led to the establishment of the discipline, as well as the first generation of American classical archaeologists, were created. It looks at the role classical archaeology played in the development of the American art museum since the later nineteenth century and considers changes in American classical archaeology from World War II to the mid 1970s. Filling the void of information on the history of classical archaeology in the United States, this lively book is a valuable contribution to literature on a subject which is enjoying ever increasing interest and attention. *A Guide to the Blacas Collection of Antiquities* Newton, 1867

**Illicit Antiquities** Neil Brodie, Kathryn Walker Tubb, 2003-08-27 The exploitation of archaeological sites for commercial gain is a serious problem worldwide. In peace and during wartime, archaeological sites and cultural institutions, both on land and underwater, are attacked and their contents robbed for sale on an international antiquities market. Objects are excavated without record, smuggled across borders, and sold for exorbitant prices in the salesrooms of Europe and North America. In some countries, this looting has now reached such a scale as to threaten the very survival of their archaeological and cultural heritage. This volume highlights the deleterious effects of the trade on cultural heritage, but in particular, it focuses upon questions of legal and local responses. How can people become involved in the preservation of their past, and what, in economic terms, are the costs and benefits? Are international conventions or export restrictions effective in diminishing the volume of the trade and the scale of its associated destruction? **Catalogue of the Collection of Antique Gems Formed by James, Ninth Earl of Southesk** James Carnegie Earl of Southesk, 1908 **Catalogue of the Loan Collection of Antiquities, Curiosities, and Appliances Connected with the Art of Printing** George Bullen, 1877 *Catalogue of the Collection of Antique Gems Formed by James, Ninth Earl of Southesk, K.T.* James Carnegie Earl of Southesk, 1908 **The Stone Sculptures of the Cesnola Collection of Cypriote Antiquities in Halls 14, 18, and 19** Cesnola Collection

Cultural Heritage Issues James A.R. Nafziger,Ann M. Nicgorski,2009-12-07 The global community dependent as always on the cooperation of nation states is gradually learning to address the serious threats to the cultural heritage of our disparate but shared civilizations The legacy of conquest colonialization and commerce looms large in defining and explaining these threats The essays contained in this challenging volume are based on papers presented at an international conference on cultural heritage issues that took place at Willamette University The conference sought to generate fresh ideas about these cultural heritage issues offer a good sense of their nuances and complexities and reveal how culture law and ethics can interact complement diverge and contradict one another This book seeks to accomplish these purposes What it explores is the fact that allong with an emerging blend of adversarial and collaborative processes to address cultural heritage issues has come a substantial broadening of the normative framework in recent years This framework now spans a welter of issues ranging from the creation of cultural safety zones during armed conflict to the ongoing rectification of genocidal conquest during the European Holocaust and World War II to the treatment of shipwrecks and their cargo to the protection of folklore and other intangibles to the promotion of traditional knowledge in the interest of biological diversity All of these topics are controversial as are the legal instruments that incorporate them but the issues they embrace are vital to us all whether our viewpoint is in the global arena a national legislature a courtroom a classroom an archaeological site or a museum      *Special Catalogue of the Collection of Antiquities* Alessandro Castellani,1876      **A descriptive catalogue of the collection of casts from the antique in the South Kensington museum** Walter Copland Perry,1884
