library management *Health Sciences Collection Management for the Twenty-First Century* Susan K. Kendall, 2018-01-15  
Selected as a 2025 Doody's Core Title *Health Sciences Collection Management for the Twenty-First Century* is intended for those with any level of experience in health sciences collection management. This book from the authoritative Medical Library Association starts with the context of health sciences publishing and covers the foundations of selection, budgeting, and management. It won't tell new librarians what to buy but will give them background and criteria that should go into their selections. However, the focus of this book is not only on best practices but also on the big picture and the deeper changes in the field that affect decision making. Subjects not always covered in many collection development textbooks such as marketing or accessibility are included because they are part of the larger collections landscape. Chapter contributors bring their own perspectives to the topics. Stories of different libraries' experiences bring interesting topics to the forefront in practical, specific, and timely detail. While whole books have been written that go into some of these topics more in depth on their own, the treatment of each topic here focuses on the unique perspective and concerns of the collection manager.

**Collections Management as Critical Museum Practice** Cara Krmpotich, Alice Stevenson, 2024-07-22  
There is a common misconception that collections management in museums is a set of rote procedures or technical practices that follow universal standards of best practice. This volume recognises collections management as a political, critical, and social project involving considerable intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies. *Collections Management as Critical Museum Practice* brings into focus the knowledges, value systems, ethics, and workplace pragmatics that are foundational for this work. Rather than engaging solely with cultural modifications such as Indigenous care practices, the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide. Through discussion of varied collection types, management activities, and professional roles, contributors develop a contextualised, reflexive practice for how core collections management standards are conceptualised, negotiated, and enacted. Chapters span national museums in Brazil and Uganda to community-led heritage work in Malaysia and Canada; they explore complexities of numbering, digitisation, and description alongside the realities of climate change, global pandemics, and natural disasters. The book offers a new definition of collections management, travelling from what is done to care for collections to what is done to care for collections and their users. Rather than use being an end goal, it emerges as a starting point to rethink collections work.
