Sampson, Dirk Ifenthaler, 2020-09-29 This book is to explores a variety of facets of online learning environments to understand how learning occurs and succeeds in digital contexts and what teaching strategies and technologies are most suited to this format Business health government and education are some of the core sectors of society which have been experiencing deep transformations due to a generalized digitalization While these changes are not novel the swift progress of technology and the rising complexity of digital environments place a focus on the need for further research and novel strategies In the context of education the promise of increased flexibility and broader access to educational resources is impelling much of higher education s course offerings to online environments The 21st century learner requires an education that can be pursued anytime and anywhere and that is more aligned with the demands of a digital society Online education not only assists students to success fully integrate a workforce that is increasingly digital but it helps them to become more comfortable with the use of technology in general and hence more prepared to be prolific digital citizens The variety of settings portrayed in this volume attest to the unlimited opportunities afforded by online learning and serve as valuable evidence of its benefit for students educational experience Moreover these research efforts assist a more comprehensive reflection about the delivery of higher education in the context of online settings *Ladies' Greek* Yopie Prins, 2017-05-09 In *Ladies' Greek* Yopie Prins illuminates a culture of female classical literacy that emerged in the second

half of the nineteenth century during the formation of women's colleges on both sides of the Atlantic. Why did Victorian women of letters desire to learn ancient Greek, a dead language written in a strange alphabet and no longer spoken? In the words of Elizabeth Barrett Browning, they wrote some Greek upon the margin, lady's Greek without the accents. Yet in the margins of classical scholarship, they discovered other ways of knowing and not knowing Greek. Mediating between professional philology and the popularization of classics, these passionate amateurs became an important medium for classical transmission. Combining archival research on the entry of women into Greek studies in Victorian England and America with a literary interest in their translations of Greek tragedy, Prins demonstrates how women turned to this genre to perform a passion for ancient Greek full of eros and pathos. She focuses on five tragedies: Agamemnon, Prometheus Bound, Electra, Hippolytus, and The Bacchae, to analyze a wide range of translational practices by women and to explore the ongoing legacy of Ladies' Greek. Key figures in this story include Barrett Browning and Virginia Woolf, Janet Case and Jane Harrison, Edith Hamilton and Eva Palmer, and Mary F. Robinson and H. D. The book also features numerous illustrations, including photographs of early performances of Greek tragedy at women's colleges. The first comparative study of Anglo-American Hellenism, Ladies' Greek opens up new perspectives in transatlantic Victorian studies and the study of classical reception, translation, and gender.

As the electronic era blurs the boundaries between conventional and distance education and between remote and in-person library users, the literature on library issues and distance learning has proliferated immensely. This work helps you keep abreast of the phenomenal changes taking place in the field of education and the issues they raise for libraries. Identifying and describing more than 750 works published since its precursor was completed in 1995, the book provides a comprehensive record of the current literature about distance and open learning in post-secondary education programs. The authors cover all types of materials from around the world, ranging from brief news items to major research reports and dissertations. In this edition, special emphasis is given to web-based distance education. Access is provided through four indexes: author, geographical institution, and subject, and indexes are cumulative from the previous two bibliographies.
