Chemistry follows on from the successful AS Chemistry which was published in 2000. A2 Chemistry covers the content of all the main A2 specifications. The text has been divided into four sections which cover the three main areas of Chemistry: Physical, Inorganic and Organic, as well as a Reference section at the end. Each of the sections is subdivided into manageable topics. A2 Chemistry aims to guide students through the transition between AS and A2 level, allowing them to grasp the more complex details and greater depth of content at this higher level. The material is presented in a clear, concise manner with many photographs and diagrams to facilitate learning. Test Yourself questions consolidate what has been learnt at AS and allow students to build on their understanding. The wider importance of each topic is explained along with details of how it relates to other topics in chemistry.
