Morphologies of Asia and Africa Alan S. Kaye, 2007-06-30 In 1997
Eisenbrauns published the highly regarded two volume Phonologies of Asia and Africa edited by Alan Kaye with the
assistance of Peter T Daniels and the book rapidly became the standard reference for the phonologies of the Afro Asiatic
languages Now the concept has been extended and Kaye has assembled nearly 50 scholars to write essays on the
morphologies of the same language group The coverage is complete copious and again will likely become the standard work
in the field Contributors are an international Who s Who of Afro Asiatic linguistics from Appleyard to Leslau to Voigt It is with
great sadness that we report the death of Alan Kaye on May 31 2007 while these volumes were in the final stages of
preparation for the press Alan was diagnosed with bone cancer on May 1 while on research leave in the United Arab
Emirates and was brought home to Fullerton by his son on May 22

conocidas 1800 1805 de Lorenzo Hervás y Panduro presenta por primera vez en una obra de esta naturaleza una amplia recopilación bibliográfica de descripciones gramaticales de todas las lenguas del mundo publicadas entre los años 1800 y 2000. Se presta atención especial en este libro a la situación de muchas comunidades lingüísticas actuales que por su reducido número de miembros y por condicionantes adversos de diverso tipo ven peligrar gravemente la continuidad de su cultura y de su lengua. El libro se enriquece con un completo índice de casi ocho mil entradas de glotónimos, nombres de lengua española y con un diccionario de glotónimos inglés-español de más de seis mil entradas. Ambos serán de mucha utilidad para traductores, educadores o informadores. La propuesta de normalización glotónica del español que se detalla en este libro, la más completa y razonada existente hasta la fecha, se basa en la dilatada experiencia del autor en este ámbito y constituye un punto de referencia imprescindible para la modernización y puesta al día de la terminología especializada de la lengua española contemporánea.

Diversity in African languages Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31. *Diversity in African Languages* contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon. Most chapters focus on single languages addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse-related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daatsi in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands.
