## **Before The European Challenge:**

**Distributional Choices in EU Climate Change Law and Policy** Javier De Cendra de Larragán, 2011-01-01 Climate change policy inevitably has two core components the goals and the means chosen to pursue those goals Decisions on goals and means necessarily have distributional consequences Any policy choice generates winners and losers While this outcome cannot be avoided even doing nothing leads to distributional consequences policymakers can through the choice design and implementation of policies shape to some extent the distribution of the burdens of mitigation and adaptation to climate change In greater depth than any previous legal study in the field this book deals with the way in which the European Union EU has dealt with climate change and with the distribution of the benefits and costs of climate change mitigation policies among affected parties With extraordinary thoroughness the author assesses the legality of choices made particularly concerning mitigation targets and timelines and examines the role that legal principles can play in the adoption interpretation and judicial testing of distributional choices His analysis of the tension between such choices and EU law is bolstered by an exploration of emerging legal principles which could provide additional guidance in this challenging and controversial area Among the core issues dealt with are the following relationship among mitigation adaptation and sustainable development regulations as means to make distributional choices distributional choices between generations and the principle of intergenerational justice distributional choices concerning firms and individuals the participation of affected parties in distributional choices access to justice in EU courts to challenge violations of procedural environmental rights the role of legal principles in making evaluating and testing distributional choices the principle of proportionality with its tests of appropriateness and necessity the principle of equality the precautionary principle the principle of prevention the polluter pays principle A concluding chapter offers deeply informed recommendations regarding the design of EU climate change law including a preliminary assessment of EU wide personal carbon trading In its insightful illumination of how the inevitable trade offs weaknesses inconsistencies and ambiguities in the way law deals with distributional choices renders them vulnerable to external pressures this book will be of enormous value to regulators and policymakers concerned with effective efficient and fair climate change measures As a critical assessment of existing EU climate change laws and policies and as a systematic analysis of the problem of burden sharing this book will also prove highly valuable to academics in environmental fields of study

Richard Macrory Hon KC,2014-10-09 This collection provides an updated edition of Richard Macrory s most influential writings including all the works which have helped shape contemporary environmental law and policy Themes explored include regulatory reform institutional change Europe and the environment and enforcement      *The Challenges of a Greater Europe* Council of Europe,1996 The limits of Europe      **World History** Eric Vanhaute,2013-07-24 World History An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present A concise and original guide to the concepts methods debates and contents of world history it combines a thematic approach with a clear and ambitious focus Each chapter traces connections with the past and the present to explore major questions in world history How did humans evolve from an endangered species to the most successful of them all How has nature shaped human history How did agricultural societies push human history in a new direction How has humankind organized itself in ever more complex administrative systems How have we developed new religious and cultural patterns How have the paths of The West and The Rest diverged over the last five centuries How at the same time has the world become more interconnected and globalized How is this world characterized by growing gaps in wealth poverty and inequality Sharp and accessible Eric Vanhaute s introduction to this exciting field demonstrates that world history is more of a perspective than a single all encompassing narrative an instructive new way of seeing thinking and doing It is an essential resource for students of history in a global context      **Documents**  
**Illustrating the History of Belgium** Belgium. Ministère des affaires étrangères, du commerce extérieur et de la coopération au développement,1978      **CEOs as Leaders and Strategy Designers: Explaining the Success of Spanish Banks** Kimio Kase,Tanguy Jacopin,2007-12-14 This book analyzes rapidly growing world class Spanish retail banks It argues that their success is due to excellent management clear headed CEOs the presence of a cluster of like minded executives who complement each other and create a homogenous strategy pattern and that IT systems and the regulatory environment have contributed greatly      **Challenges to Democratic Governance in Developing Countries** Gedeon Mudacumura,Gökтуğ Morçöl,2014-01-04 Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries statistics show that the majority of these countries have not yet achieved significant improvements in living standards While some regions make strides towards improving the living conditions of their citizens Sub Saharan Africa for instance is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries As a result the institutional foundations of these countries are weakened public funds are misappropriated and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined It is therefore not surprising that a 2008 Transparency International report

found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries This book investigates the problems of democratic governance particularly as they relate to corruption and also whether democracy should be based on universal principles or local context and historical factors It also analyses the rule of law in promoting democratic governance and curbing corruption and if governmental non governmental organizations and civil societies are effective in promoting democratic governance and curbing corruption This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries It is premised on the importance of bridging theory and practice which has been lacking in most local and international development publications making of interest to scholars and policy makers alike concerned with public administration in developing countries

*Just Schools* Martha Minow, Richard A. Shweder, Hazel Rose Markus, 2008-04-22 Educators and policymakers who share the goal of equal opportunity in schools often hold differing notions of what entails a just school in multicultural America Some emphasize the importance of integration and uniform treatment for all while others point to the benefits of honoring cultural diversity in ways that make minority students feel at home In *Just Schools* noted legal scholars educators and social scientists examine schools with widely divergent methods of fostering equality in order to explore the possibilities and limits of equal education today The contributors to *Just Schools* combine empirical research with rich ethnographic accounts to paint a vivid picture of the quest for justice in classrooms around the nation Legal scholar Martha Minow considers the impact of school choice reforms on equal educational opportunities Psychologist Hazel Rose Markus examines culturally sensitive programs where students exhibit superior performance on standardized tests and feel safer and more interested in school than those in color blind programs Anthropologist Heather Lindkvist reports on how Somali Muslims in Lewiston Maine invoked the American ideal of inclusiveness in winning dress code exemptions and accommodations for Islamic rituals in the local public school Political scientist Austin Sarat looks at a school system in which everyone endorses multiculturalism but holds conflicting views on the extent to which culturally sensitive practices should enter into the academic curriculum Anthropologist Barnaby Riedel investigates how a private Muslim school in Chicago aspires to universalist ideals and education scholar James Banks argues

that schools have a responsibility to prepare students for citizenship in a multicultural society Anthropologist John Bowen offers a nuanced interpretation of educational commitments in France and the headscarf controversy in French schools Anthropologist Richard Shweder concludes the volume by connecting debates about diversity in schools with a broader conflict between national assimilation and cultural autonomy As America s schools strive to accommodate new students from around the world Just Schools provides a provocative and insightful look at the different ways we define and promote justice in schools and in society at large
