## **Behaving Like Adults:**

**Behaving Like Adults** Anna Maxted, 2003-05-13 Modern women don't believe in love. Believing in love carries roughly the same stigma as halitosis. It's as old-fashioned as going on a diet as opposed to a detox. I know all that and yet I do. With her first two irresistible novels, Anna Maxted won the hearts of readers everywhere. Now in *Behaving Like Adults*, she introduces us to twenty-nine-year-old Holly, the sunny optimistic owner of Girl Meets Boy, a dating service for those who are beautiful inside and out. She's ambitious and successful with her matchmaking, but she hasn't quite fulfilled her own relationship dreams. Her ex-fiancé Nick seems unlikely to progress from his job as Mr. Elephant children's party entertainer. So when her friends dare her to pick a man off the top of the pile, she's game. But in one awful evening, the perfect on paper Stuart turns out to be a thorough cad, and Holly's belief in the goodness of humanity takes a hit. How can she make good matches when she can no longer trust her ability to read people? What does this mean for her business and her romantic future? Holly's friends and colleagues are drawn into the complicated drama of her life while Holly learns her most important lesson: to trust herself.

Rueful and hilarious, *Behaving Like Adults* is a must-read novel of men and women growing up in spite of themselves.

**Patterns of Human Growth** Barry Bogin, 2020-11-19 This completely revised edition provides a synthesis of the forces that shaped the evolution of the human growth pattern: the biocultural factors that direct its expression; the intrinsic and extrinsic factors that regulate individual development; and the biomathematical approaches needed to analyze and interpret human growth. After covering the history, philosophy, and biological principles of human development, the book turns to the evolution of the human life cycle. Later chapters explore the physiological, environmental, and cultural reasons for population variation in growth and the genetic and endocrine factors that regulate individual development. Using numerous historical and cultural examples, social, economic, political, and economic forces are also discussed. A new chapter introduces controversial concepts of community effects and strategic growth adjustments, and the author then integrates all this information into a truly interactive biocultural model of human development. This remains the primary text for students of human growth in anthropology, psychology, public health, and
