Behavioral Epidemiology And Disease Prevention:

Behavioral Epidemiology and Disease Prevention Robert M. Kaplan, Michael H. Criqui, 2012-12-06 In the United States and in Europe there has been an increasing interest in the relationship between individual behavior and disease. The American National Academy of Sciences, Hamberg, Elliott and Parron, 1982, through its Institutes of Medicine has estimated that as many as 50 percent of chronic disease cases can be traced to individual behaviors such as smoking, diet, exercise, etc. Similar conclusions have been reached by a variety of European investigators and institutes. The World Health Organization has also expressed considerable interest in individual behavior in relation to the development of chronic disease. Thus throughout the NATO countries there has been increased awareness of the relationship between behavior and disease. However, communication among investigators in different countries has been rather limited. Further, many different scientific disciplines including psychology, sociology, medicine, microbiology, statistics, and epidemiology have all developed new and different literatures in this field. One purpose of this book is to bring together contributions from scientists in each of these fields. Much of the variance in individual health behavior occurs across countries rather than within countries. Thus we can learn much from comparing behavior-disease relationships across countries. To date there have been few studies which have had an adequate international basis for these comparisons. Interest in behavioral epidemiology is a relatively recent phenomena. Thus many scientists are entering the field without uniform background experience or training. This book discusses approaches common in a variety of NATO countries.

Behaviorial Epidemiology Ray M. Merrill, Cara L. Frankenfeld, Nancy Freeborne, Michael Mink, 2016 Behavioral sciences research: Health behavior and theory. Determinants of behavior. Behavioral epidemiologic research. Frequency measures in epidemiology. Sources and uses of available population based behavior data. Data collection, misclassification and missing data. Statistical application to behavior data. Epidemiological input for selecting behavioral intervention targets.

Handbook of Health Promotion and Disease Prevention James M. Raczynski, Ralph J. DiClemente, 2013-11-11 The idea for this volume developed when we were co-teaching our introductory master's level course in the Department of Health Behavior at the UAB School of Public Health, a core course for all masters of public health students in the school regardless of the department in which they enrolled or the focus of their studies. Hence in the course we sought to provide both students in our department as well as those who might not ever again take a health behavior course with an overview that would both truly represent the field and substantially provide educational research and public health practice benefits. This was and continues to be a challenge with the diversity of students specializing in fields that include not only health behavior but also bio-statistics, environmental health sciences, epidemiology, health care organization and policy, international health and maternal and child health. The course that we taught attempted to provide the students with an overview of some of the important health promotion and disease prevention theories, methods, and policy issues while reviewing applications of these theories and methods to promoting health and pre

venting disease through a variety of channels for a variety of disease outcomes and among a variety of populations Since no one text provided this variety of readings we depended on readings and guest lectures *Handbook of Health Psychology and Behavioral Medicine* Jerry M. Suls, Karina W. Davidson, Robert M. Kaplan, 2011-07-06 What psychological and environmental forces have an impact on health How does behavior contribute to wellness or illness This comprehensive volume answers these questions and others with a state of the art overview of theory research and practice at the interface of psychology and health Leading experts from multiple disciplines explore how health and health behaviors are shaped by a wide range of psychological processes and social environmental factors The book describes exemplary applications in the prevention and clinical management of today's most pressing health risks and diseases including coronary heart disease depression diabetes cancer chronic pain obesity sleep disturbances and smoking Featuring succinct accessible chapters on critical concepts and contemporary issues the Handbook integrates psychological perspectives with cutting edge work in preventive medicine epidemiology public health genetics nursing and the social sciences **Behavioral Medicine Approaches to Cardiovascular Disease Prevention** Kristina Orth-Gomer, Neil Schneiderman, 2013-05-13 Cardiovascular disease CVD is the number one killer of men and women in industrialized countries In older age groups CVD is also the most important cause for hospitalization and in many countries it is the basis of early retirement from work Thus CVD is associated with enormous costs for care and loss of productivity as well as for disabilities pensions etc All this has motivated clinicians and scientists to develop and implement new methodologies and technologies to better care for patients who are hospitalized for heart disease Efforts to improve care in the acute phases of coronary heart disease CHD have been successful During the last decade the immediate mortality risk of a patient admitted to coronary care for a suspected myocardial infarction or other acute coronary syndrome has decreased to less than 10% Despite these achievements CVD continues to represent a major threat to the health of middle aged and elderly men and women This volume addresses myriad aspects of CHD prevention including biobehavioral and psychosocial factors behavioral epidemiology behavioral intervention models and policy The first section of the text provides an introduction to CVD prevention and behavioral medicine The second section introduces two theoretically different approaches to preventive action high risk and population based strategies The third section describes and discusses the important questions of how behavioral sciences can be conceptually integrated into traditional medically based preventive efforts The fourth section presents both population and high risk behavioral intervention approaches In summary this volume examines the social environment and its potentials for preventive actions reviews the psychosocial and biobehavioral mechanisms involved in these effects and describes concrete and practical implementations of behavioral medicine knowledge as they have been applied to CHD prevention Current Catalog National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965-70 *Public Health Reports*, 1985 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1985 **Health and Human Behavior** Robert Malcolm
