Behavioral Observations In Cardiovascular Research:

Behavioral Observations in Cardiovascular Research A. Appels, 1991-06-01 Six Dutch scientists describe their observations of heart patients observations used to design new epidemiologic or animal studies and new treatments The results of these studies offer increased insight into the relative importance of stress as a cause of heart attacks and into the propensity of some people to suffer from stress Annotation copyrighted by Book News Inc Portland OR *Biological and Psychological Factors in Cardiovascular Disease* Thomas H. Schmidt, Theodore M. Dembroski, Gerhard Blümchen, 2012-12-06 An opening address should ask the right questions which we expect to answer during the coming years A good opening address should formulate hypotheses for falsification during the conference or in the near future Mter Dr Groen s excellent lecture yesterday I feel better about my task because I feel I am not alone in asking the ten questions in my abstract It is an honor for me to give this short paper largely based on my experiences during 15 years as medical director of a rehabilitation center in Ba varia as a teacher at two medical schools in Munich and Innsbruck and as an old fashioned holistic cardiologist However it also is a difficult task for me because the subject of this conference concerning biobehavioral factors in coronary heart disease is controversial not only in the medical society but in my own mind as well When I organized one of the first conferences on stress and coronary heart disease in West Germany in 1976 followed by conferences in 1979 and 1980 the semantic problems between physicians and psychologists were very significant However communication has improved in this area during the last decade The most encouraging event in this field was a symposium in May 1984 in Rotenburg Fulda on the topic Return to Work after Bypass Surgery organized by a cardiac surgeon Dr Walter *Behavioral Approaches to Cardiovascular Disease* Richard S.
