Being Me Is Being Human:

Being Me Being You Samuel Fleischacker, 2019-10-23 Modern notions of empathy often celebrate its ability to bridge divides to unite humankind But how do we square this with the popular view that we can never truly comprehend the experience of being someone else In this book Samuel Fleischacker delves into the work of Adam Smith to draw out an understanding of empathy that respects both personal difference and shared humanity After laying out a range of meanings for the concept of empathy Fleischacker proposes that what Smith called sympathy is very much what we today consider empathy Smith's version has remarkable value as his empathy calls for entering into the perspective of another a uniquely human feat that connects people while still allowing them to define their own distinctive standpoints After discussing Smith's views in relation to more recent empirical and philosophical studies Fleischacker shows how turning back to Smith promises to enrich clarify and advance our current debates about the meaning and uses of empathy

Being Human Ron Broglio, Frederick Young, 2017-10-02 Technology and animals often serve as the boundaries by which we define the human In this issue contributors explore these categories as necessary supplements or as porous membranes which disturb the scaffolding of how the human is constructed A lingering question throughout is whether we have ever been human or if such a category is a non localizable ideal or perhaps a misnomer In this collection of essays internationally known theorists muddle the categorical boundaries such that animals and technologies become necessary components rather than limits for what it means to be human They examine a range of subjects including apophatic animality critical media objects to think with biosemiotic insect resonances the monstrous and horrific which dislodges our cultural animals and the problem of thinking of animality as stupidity Novels films digital objects scientific laboratories philosophical texts animals on the road and in the fields serve as sites for inquiry The result of these investigations is the spectral possibility that we are not the humans we make ourselves out to be This book was originally published as a special issue of *Angelaki*
