Evans, 2015-06-03 In the search for the causes of the First World War and the origins of Hitler's Third Reich the attention of historians has turned increasingly towards the development of German society under Kaiser Wilhelm II These ten essays first published in 1978 introduced interpretations of Wilhelmine Germany to an English speaking audience and contributed towards the discussion of these interpretations that were taking place amongst German historians This book is ideal for student of history particularly German history Heavenly Fatherland Jeremy Best, 2020 Motivated by a theology that declared missionary work was independent of secular colonial pursuits Protestant missionaries from Germany operated in ways that contradict current and prevailing interpretations of nineteenth century missionary work As a result of their travels these missionaries contributed to Germany's colonial culture Because of their theology of Christian universalism they worked against the bigoted racialism and ultra nationalism of secular German empire building Heavenly Fatherland provides a detailed political and cultural analysis of missionaries mission societies mission intellectuals and missionary supporters Combining cases studies from East Africa with studies of the metropole this book demonstrates that missionaries ideas about race and colonialism influenced ordinary Germans experience of globalization and colonialism at the same time that the missionaries shaped colonial governance By bringing together religious and colonial history the book opens new avenues of inquiry into Christian participation in colonialism During the Age of Empire German missionaries promoted an internationalist vision of the modern world that aimed to create a multinational multiracial heavenly Fatherland spread across the globe **The Works of Maurice Hewlett in Ten Volumes: v. 6-10** Maurice Henry Hewlett, 1900 **Religion and Politics in the Nineteenth-Century** Kimberly Cowell-Meyers, 2002-06-30 Cowell Meyers examines the continued sectarian conflict on the island of Ireland from a comparative and historical framework Analyzing the process through which sectarian conflict was managed on the continent she identifies the unique evolution of the Irish situation Whereas European Catholics such as those in the new Germany developed an institutional pillar to defend themselves and protect their interests in the modern plural state Irish Catholics developed a radical nationalist movement in the same period at the end of the 19th century As elements of the British political system pushed the Irish Catholic mobilization toward more separatist goals and means they thwarted the process of accommodation seen in other European settings The shape and dynamics of Catholic mobilization in the last three decades of the 19th century set Catholics and Protestants on a path toward the management of sectarian conflict in Germany and continental Europe and toward the perpetuation of conflict in Ireland Much like conflict

resolution literature as well as liberal and pluralist theory mischaracterizes the role of exclusive voluntary associations in the amelioration of conflict Cowell Meyers asserts that voluntary organizations if they are encouraged to do so as they were in continental Europe in the late 19th century can provide the channels through which intense conflicts are managed Although exclusive mobilizations reinforce social cleavages careful handling may make them constructive political formations that allow for the channeling of differences Of particular interest to scholars students and other researchers involved with peace and conflict resolution religion and politics and the history of modern Ireland and Germany *The Eyes of the Blind* Mary Patricia Willcocks,1917 *The Fortunes of Colonel Torlogh O'Brien* Joseph Sheridan Le Fanu,1896 **Warhost of Vastmark** Janny Wurts,1995-12 Fantasy roman **The Royal Magazine** ,1916 German Peasants and Agrarian Politics, 1914-1924 Robert G.
