Collecting Antique Maps:

Collecting Antique Maps Jonathan Potter, 1999 **A Guide to Collecting Antique Maps** Christopher W. Lane, Donald H. Cresswell, 1997 **Collecting Antique Maps** Jonathan Potter (cartographe.), 1992 *Collecting antique maps* Ronald V. Tooley, 1978 [Collecting Antique Maps](#) Ronald Vere Tooley, 1976 **Antique Maps** Carl Moreland, David Bannister, 1994-01-01 A standard reference work and collector's guide to old maps. Antique Maps is now firmly established as a definitive reference work. With extensive information on the general historical background, details of all the major map makers and practical advice on collecting old maps, it provides an excellent introduction for the beginner as well as a mass of precise and clearly organized information for the expert and the serious collector. A beautiful edition in itself, this timeless volume evokes the elegance of maps from the past and the charm of all the distant places they suggest to show them not only as historical artefacts but also as works of art. *Antique Maps, a Collector's Handbook* Carl Moreland, David Bannister, 1983

[Collecting Old Maps](#) Francis J. Manasek, 2015 **Antique Maps for the Collector** Richard Van de Gohm, 1973

Beautifully illustrated throughout with more than 130 color and black and white reproductions that will aid in identifying the styles of the various cartographers, this book will serve as a constant source of reference and enjoyment to experienced and beginning collectors alike. [The History of Cartography, Volume 6](#) Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, *Cartography in the Twentieth Century*, continues this tradition with a groundbreaking survey of the century just ended and a new full-color encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps. *Art Collecting and Gifts to Museums* Paul van der Grijp, 2024-12-06 *Art Collecting and Gifts to Museums* questions why private collectors donate their collection or parts of it to museums and examines what the implications of this gifting process might be. Presenting case studies from Europe, North America, East Asia, and the South Pacific, this book is concerned with both elite and popular collections and examines

the act of donating art from the collector's point of view. Demonstrating that art museums depend on donations from private collectors, Paul van der Grijp emphasizes that it is crucial to understand the psychological, sociological, economic, and educational motivations for gifting works of art to institutions. Taken together, the chapters argue that collectors donate to museums because the latter represent an imagined community to whom those collectors would like to bestow a sacred gift. Private collectors, Van der Grijp maintains, are motivated to ensure the immortality of their collections and ultimately to preserve some memory of their own lives in the process. Art Collecting and Gifts to Museums will be of interest to researchers and students engaged in the study of museums, culture, art, anthropology, history, and sociology. Collecting Old Maps

Francis J. Manasek, Marti Griggs, Curt Griggs, 2015-02-15. The highly anticipated second edition of Collecting Old Maps is completely revised and expanded with over 400 color illustrations. While maintaining the original approach to the nuts and bolts of map collecting, there is new information on collecting in the digital age, building and disposing of a collection, papermaking history, and the mythological figures, symbols, and allegory used in cartography. The most significant change to this new edition is the Map Gallery, which is more comprehensive and profusely illustrated in full color. Nearly 200 maps were assembled to illustrate the five-century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences. They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy, then to the Baroque Dutch compositions, the refined style of scientific cartographers, and finally the technically advanced but sometimes whimsical approach of 20th-century mapmakers. These maps represent a broad range of geographic regions, cartographic importance, and prices. Rather than focusing on the rare and obscure, these are maps that can be collected today. Antique maps, Carl Moreland, 1983.

Antique Maps of the British Isles, David A. Smith, 1982. Star Maps, Nick Kanas, 2019-08-20. Explore the beauty and awe of the heavens through the rich celestial prints and star atlases offered in this third edition book. The author traces the development of celestial cartography from ancient to modern times, describes the relationships between different star maps and atlases, and relates these notions to our changing ideas about humanity's place in the universe. Also covered in this book are more contemporary cosmological ideas, constellation representations, and cartographic advances. The text is enriched with 226 images, 141 in color, from actual antiquarian celestial books and atlases, each one with an explanation of unique astronomical and cartographic features. This never-before-available hardcover edition includes two new chapters on pictorial style maps and celestial images in art, as well as over 50 new images. Additionally, the color plates are now incorporated directly into the text, providing readers with a vibrant, immersive look into the history of star maps. **Antique Maps, Sea Charts, City Views, Celestial Charts & Battle Plans**, David C.
