Collecting Old Maps:

Collecting Old Maps Francis J. Manasek, 2015 **Collecting Old Maps** Francis J. Manasek, Marti Griggs, Curt Griggs, 2015-02-15 The highly anticipated second edition of *Collecting Old Maps* is completely revised and expanded with over 400 color illustrations While maintaining the original approach to the nuts and bolts of map collecting there is new information on collecting in the digital age building and disposing of a collection papermaking history and the mythological figures symbols and allegory used in cartography The most significant change to this new edition is the Map Gallery which is more comprehensive and profusely illustrated in full color Nearly 200 maps were assembled to illustrate the five century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy then to the Baroque Dutch compositions the refined style of scientific cartographers and finally the technically advanced but sometimes whimsical approach of 20th century mapmakers These maps represent a broad range of geographic regions cartographic importance and prices Rather than focusing on the rare and obscure these are maps that can be collected today

Mapping the Nation Susan Schulten, 2012-06-29 A compelling read that reveals how maps became informational tools charting everything from epidemics to slavery Journal of American History In the nineteenth century Americans began to use maps in radically new ways For the first time medical men mapped diseases to understand and prevent epidemics natural scientists mapped climate and rainfall to uncover weather patterns educators mapped the past to foster national loyalty among students and Northerners mapped slavery to assess the power of the South After the Civil War federal agencies embraced statistical and thematic mapping in order to profile the ethnic racial economic moral and physical attributes of a reunified nation By the end of the century Congress had authorized a national archive of maps an explicit recognition that old maps were not relics to be discarded but unique records of the nation's past All of these experiments involved the realization that maps were not just illustrations of data but visual tools that were uniquely equipped to convey complex ideas and information In Mapping the Nation Susan Schulten charts how maps of epidemic disease slavery census statistics the environment and the past demonstrated the analytical potential of cartography and in the process transformed the very meaning of a map Today statistical and thematic maps are so ubiquitous that we take for granted that data will be arranged cartographically Whether for urban planning public health marketing or political strategy maps have become everyday tools of social organization governance and economics The world we inhabit saturated with maps and graphic information grew out of this sea change in spatial thought and representation in the nineteenth century when Americans learned to see themselves and their nation in new dimensions

discussion ranges widely from Northern Song landscape painting to nineteenth century American and British landscape painting and photography from prehistoric petroglyphs and medieval portolan charts to seventeenth century Dutch cartography and land survey maps of the American frontier From these culturally and historically diverse forays a theory of representation emerges Casey proposes that the representation of place in visual works be judged in terms not of resemblance but of reconnecting with an earth and world that are not the mere content of mind or language a reconnection that calls for the embodiment and implacement of the human subject Book jacket **Old Decorative Maps and Charts** Arthur Lee Humphreys,1926 **Early Maps of South-East Asia** R.
