commercial efficiency Great Britain. Committee on Industry and Trade, 1927 Noninvasive Survey Methods for Carnivores
Robert A. Long, Paula MacKay, Justina Ray, William Zielinski, 2012-09-26 The status of many carnivore populations is of
growing concern to scientists and conservationists making the need for data pertaining to carnivore distribution abundance
and habitat use ever more pressing Recent developments in noninvasive research techniques those that minimize
disturbance to the animal being studied have resulted in a greatly expanded toolbox for the wildlife practitioner Presented in
a straightforward and readable style Noninvasive Survey Methods for Carnivores is a comprehensive guide for wildlife
researchers who seek to conduct carnivore surveys using the most up to date scientific approaches Twenty five experts from
throughout North America discuss strategies for implementing surveys across a broad range of habitats providing input on
survey design sample collection DNA and endocrine analyses and data analysis Photographs from the field line drawings and
detailed case studies further illustrate on the ground application of the survey methods discussed Coupled with cutting edge
laboratory and statistical techniques which are also described in the book noninvasive survey methods are efficient and
effective tools for sampling carnivore populations Noninvasive Survey Methods for Carnivores allows practitioners to
carefully evaluate a diversity of detection methods and to develop protocols specific to their survey objectives study area and
species of interest It is an essential resource for anyone interested in the study of carnivores from scientists engaged in
primary research to agencies or organizations requiring carnivore detection data to develop management or conservation
